FARM CALENDAR

Timely Reminders from The Pennsylvania State College

Say It With Milk—Many poultrymen have trouble with their chicks when they use new galvanized milk fountains. This danger may be removed if the dishes are filled with milk and allowed to stand in a warm place for three or four days.

Prepare Fruit Storage—It is a good plan to thoroughly clean and disinfect the storage cellar. Remove the old rotten fruit, apply white wash or some disinfectant, and give the room a thorough airing.

Measure the Pull—"How much can your team pull" is the question of the day wherever drivers meet in Pennsylvania communities. This will be answered in a dozen counties by the Penn State dynamometer this fall.

Count the Ton Litters—The first six litters weighed in Pennsylvania for the ton litter club were successful. Two of these were 8-pig litters. Watch the rest of the 357 nominated litters come through with the required weights.
