Graham Brothers Again Lower Prices

Announcement of a reduction of \$100.00 in the price of Graham Brothers one-ton truck, effective September 9th, has been received by Walter R. Hosterman, local Dodge Brothers dealer.

"So substantial a reduction in the price of this popular one-ton truck, coming less than four months after the announcement of a previous reduction of \$80.00, says Mr. Hosterman, "is in line with previous assurances that the truck buyer will always benefit equally with Graham Brothers in every economy affected through increased production."

"Graham Brothers, now first in the world as exclusive manufacturers of motor trucks, are able to make this second reduction and at the same time to make even further improvements in the quality of their trucks."

"In addition to their greatly increased production—their production for the first six months of 1925 was equal to the entire output of 1924—the enlarged and improved facilities afforded by the new factory into which Graham Brothers moved July 1 have aided greatly in making possible these reductions in manufacturing cost."

FARM CALENDAR

Timely Reminders from The Pennsylvania State College

**Make Good Silage**—Even distribution and proper packing during filling will insure a good quality of silage provided walls of the silo are in good condition.

**Order Forest Trees, Soon**—Those planning to set out forest trees next spring should not postpone ordering. Do this at an early date. Indications are that the State tree nurseries will again be unable to furnish all the trees requested. Private nurseries also report a large number of orders. Get blanks for State nursery orders from the nearest district forester or from your county agent.

**Plant Fall Vegetables**—Are your coldframes ready for fall seedings? The time is here for planting lettuce, radishes, spinach, fast-growing carrots, and many other cool season vegetables that will reach edible size in from one and one-half to two months of time.

**Find Many Poultry Worms**—Sanitation is the most important factor in raising poultry. Eighty per cent of the hens sent into the Pennsylvania State College for examination or inspected by the poultry extension specialists on the farms are found to be infested with internal parasites. The worms most commonly found are the large round worms, about two inches in length; the small round worm found in the ceca, not over one-fourth of an inch long; and the tape worms.

**Pick Good Seed Corn**—Pick seed corn while ears are on the stalk. This gives an opportunity to observe actual growing conditions as to size of stalk and health of plant. Proper curing of such ears means good seed for the 1926 crop. It is not too early to consider the next spring's planting.

It has never been the policy of Dodge Brothers, Inc., to build yearly models.

Firestone

Tire Prices Are LOW—CRUDE RUBBER HIGHEST IN YEARS

Buy Now and Save Money!

The unprecedented demand for Firestone quality and mileage has more than doubled the sales of Gum-Dipped Cords to car owners so far this year, enabling us—because of this tremendous volume—to keep prices low.

Experienced car owners insist on tires that deliver the greatest mileage at the lowest cost per mile, because such tires last longer—make the restricted rubber supply go further—reduce crude rubber costs—and help maintain the present low tire prices.

Gum-Dipping, the MOST MILES PER DOLLAR

Firestone extra process, is also one of the biggest and most important economy factors in tire performance. This method of treating cord fabric, developed by Firestone tire chemists and engineers, insulates every fiber of every cord with rubber, and gives the sidewalls the extra strength to withstand the extra flexing strain—insuring maximum safety, comfort and economy.

Buy now—make sure of economical transportation by obtaining these outstanding Firestone superiorities at present low prices.
