Firestone

Why Gum-Dipping is so Important to Car Owners

GUM-DIPPING—the Firestone extra process builds into tires extra quality by impregnating and insulating every fiber of every cord with rubber.

This exclusive method is carried out in special Gum-Dipping plants, after which the cords are put through the usual calendaring process.

By this method, added strength and flexibility are imparted to the cords, making Gum-Dipped Balloons most serviceable and enduring over rough roads.

DODGE BROTHERS

CONSTANTLY IMPROVED

BUT NO YEARLY MODELS

It has never been the policy of Dodge Brothers, Inc., to build yearly models.

When an improvement is discovered, perfected, tested and found good, it is made AT ONCE. The car is always up-to-date.

Moreover, the owner does not have to fear that his Dodge Brothers Motor Car will be made obsolete, shortly after he has bought it, by the announcement of radically new types.
