

# ASPIRIN

SAY "BAYER ASPIRIN"—Genuine

Unless you see the "Bayer Cross" on tablets, you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over 25 years for

- Colds
- Headache
- Neuritis
- Lumbago
- Pain
- Neuralgia
- Toothache
- Rheumatism

**DOES NOT AFFECT THE HEART**

*Safe* → Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monocetate of Salicylic Acid

**Even Small Ones**  
"I'd like to give you a small present, dear, on our anniversary."  
"Oh, John, I just love diamonds!"  
The reason why love is blind is so that it will not see its finish.

**Puzzles**  
Charles—Women are puzzles, aren't they?  
Thomas—Yes; I've had to give several of them up.—Finance.  
Be hardy, but be not hard.

## Children Cry for

**MOTHER:**—Fletcher's Castoria is a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Wm. H. Fletcher* Proven directions on each package. Physicians everywhere recommend it.

**Natural Question**  
"Some children are just naturally bright."  
"Yes? What did yours do now?"  
Facts are stubborn things that never apologize.

**Simile**  
"Mabel's head is like a doorknob."  
"Why?"  
"Because it's so easy to turn."  
A short answer seldom helps things along.

"I'll tell you why they wouldn't insure you—"

"You allowed constipation to become chronic—until finally it resulted in organic disease."

"People don't realize how insidious constipation is. Its first effects are hardly more than annoyances—headaches, loss of appetite, sleeplessness and the like. But in time, as the body is subjected to continued intestinal poisoning, it may lead to high blood pressure, rheumatism, diabetes or even Bright's disease."

"Stop constipation if you wish to live long. Take a little Nujol every day—that will keep you regular."

### Nujol relieves constipation in Nature's way

Constipation is dangerous for anybody. Nujol is safe for everybody. It does not affect the stomach and is not absorbed by the body. Medical authorities approve Nujol because it is safe, gentle and natural in its action. Nujol makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles. Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time. Ask your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

For Constipation

## Best to Be Sure About Seed Corn

Corn Not Out of Field Before Frost Should Be Tested for Germination.

(Prepared by the United States Department of Agriculture.)  
Seed corn for 1926 planting offers an interesting contrast to that for last year, says the United States Department of Agriculture. From the standpoint of maturing corn, the summer of 1924 was one of the poorest in many years. As a consequence there was every indication that there would not be enough seed corn to go around in the spring of 1925. An active campaign by the agricultural experiment station and the federal Department of Agriculture, aided by realization of the very evident danger, resulted in more seed corn being field selected and dried than ever before. Finally, unusually favorable weather during September and October permitted much corn to dry in the field without being damaged for seed purposes. Therefore an abundance of good seed corn was available for planting in 1925.

**Seed Corn Situation.**  
In contrast, the summer of 1925 was unusually favorable for the rapid development of corn. The crop went into September in excellent condition and the prospects for seed corn were the best. Field selection of seed corn was put off in many cases because of these facts and early freezes occurred before many farmers had selected their seed. These conditions have contributed to a prospective seed corn situation next spring which, while not serious, may be unfavorable.

In Iowa, for example, the temperature during the last week in October was low, zero weather occurring over more than half of the state. Corn containing more than 20 per cent of moisture is ruined for seed purposes when subjected to such temperatures. Conditions similar to those in Iowa occurred over much of the corn belt.

**Test for Germination.**  
Farmers who did not have their seed corn out of the field before the first freeze should test it for germination as soon as possible. Directions for conducting such tests may be had from their state agricultural experiment station or the United States Department of Agriculture. A preliminary test of two kernels from each of 100 ears of the kind to be planted will show whether the seed can be used or whether other arrangements must be made.

### Carefully Select Eggs for Hatching Purposes

"Don't blame all poor hatches on the incubator," says the poultry department of the New Jersey agricultural experiment station. Over 75 per cent of poor hatching is due to the egg and the hen that laid the egg. Some hens will continually lay eggs that will not hatch, while others will continually lay eggs nearly all of which will hatch strong healthy chicks.

The elimination from the breeding pen of hens whose eggs will not hatch, although fertile, will help greatly to increase the percentage of hatch of all eggs set.

Trap-nesting and pedigree hatching are the only sure ways of getting rid of poor hens, but these methods cannot always be used on the farm. By watching carefully at hatching time the shape and size of individual eggs, and also the texture of the shell, some of these troubles may be avoided in future hatches.

Abnormally large or small eggs, mis-shaped eggs, or eggs with thin shells or shells of poor texture will not hatch well, and therefore should not be set. It is also unwise to set tinted eggs, or eggs that weigh less than two ounces, not because they will not hatch, but in order to avoid breeding these characteristics into the flock.

### Sweet Cream Buttermilk Made Into Milk Powder

Recent experiments have been made by the Minnesota Co-operative Creameries association as to the possibilities of making sweet cream buttermilk into a milk powder. The buttermilk from several plants was assembled at a plant equipped for making milk powder, and 550 pounds was made in a single day as a trial. Samples of the product were distributed among the bakers for the purpose of determining the relative quality of the product. If the plant is successful it will present another opportunity for bringing additional income to the milk producers. Recent contracts have been made which increased the quantity of sweet cream sold at eastern markets to nine carloads a week.

### Water Supply for Live Stock in Cold Weather

Live stock frequently suffer from lack of water during freezing weather. When the only water supply available is a stream or spring, daily attention is necessary to be sure that the ice is broken. Often the approach to such a water supply becomes so slippery that it is almost impossible for the cattle to get to and from around a great deal. After a number of experience animals will avoid such a water hole just as long as they can possibly get along without water. Live stock need plenty of water all the time.

## Turning Corn Into Dairy Feeds Urged

Surplus Crop Fed to Cows Will Relieve Farmer.

Farmers who are worrying about the surplus of corn and the relatively low price of their product just now can secure as much as \$1.25 a bushel by turning this corn into dairy feeds and market the dairy products.

"By marketing their surplus corn in the form of dairy products," says M. D. Munn, president of the National Dairy Council, who has been conferring with leaders in the dairy industry and bankers on the question, "this corn will return the farmer about \$1.25 a bushel based on the average price of dairy products in 1925. By so doing we will not upset the balance of grain produced by having corn consumed in the form of corn meal mush, bread or muffins in place of a bushel of wheat. At best we can only eat a given amount of bread and cereals, and an increased consumption of one form of bread necessarily decreases the consumption of another."

While corn meal mush and milk is palatable and healthful and should be freely eaten, it does not constitute an effective way of consuming the surplus corn. Milk and its products are the most healthful foods we have, and by consuming more of these people will have better health, be more efficient and at the same time directly assist in relieving the farmer of his burden of surplus corn providing they will feed it to the dairy cows in a properly balanced ration.

"If the public is really willing and anxious to help in relieving the farmer of this corn surplus burden," says Mr. Munn, "he can best assist by increasing the consumption of milk, butter, ice cream and cheese and at the same time be more healthful and efficient. The properly balanced ration for the dairy cow includes corn meal, corn gluten feed, together with ground oats, barley, bran, cottonseed meal, beet pulp, etc. This corn gluten feed is a by-product from the manufacture of starch and sugar from corn. Therefore the consuming public can further assist by using more corn sugar and less imported cane sugar."

### Raising Turkeys Helps Destroy Grasshoppers

Development of Wyoming as a turkey-producing section has been urged by extension workers of the state and the United States Department of Agriculture for three reasons: The climate induces fattening in time to place the stock early on the holiday markets; live stock growers need a supplemental cash crop; and where there are sufficient turkeys, grasshoppers cease to be a liability and become an asset, for these birds have a high regard for the grasshopper, and large appetites.

In Park county alone Thanksgiving shipment totaled over 75,000 pounds of turkey after four years' emphasis on turkey production. Big Horn, Fremont, Goshen, and other counties have made similar progress.

Increased interest in good stock and good management of the flock was fostered by county agents and other extension workers, with the result that in one year the average weight of the turkeys shipped to market was two pounds heavier than those of the preceding season, and this year's crop is said to show even greater advance.

### Corn Yield Problem Is One of Soil Fertility

Corn growers face a problem of raising general soil fertility if they are to redeem production from the decline which depletion of organic matter in the soil has brought about, according to Prof. R. I. Throckmorton, head of the department of agronomy at the Kansas State Agricultural college.

General fertility, Professor Throckmorton pointed out, can be increased by growing corn in rotation with such crops as alfalfa, clover, and soy beans; by returning all manure and crop residue to the soil; and by good tillage methods.

### Alfalfa Rated High

Alfalfa is a valuable dairy feed. Many farmers who have alfalfa and their own corn and oats are only paying about \$35 a ton for grain mixtures this winter. Alfalfa not only makes it possible to have a cheap grain mixture but helps cows give more milk than any other roughage will. If alfalfa is not already grown on the farm, get in touch with the county agent and have your soil tested for lime requirements; also obtain sources of good seed and inoculation.

### FARM FACTS

Phosphor manure is much more valuable than untreated manure.

Painting the lowest cellar stairstep white reduces the possibility of accident from missteps.

The most successful farmer is the one who incorporates into his mental capital lessons from experience of other farmers and investigators.

When it is inconvenient and often impossible for the farm family to make frequent visits to local markets during the winter months, the vegetables needed should come from the supply furnished by the farm garden.

# MONARCH Coffee Cocoa

Quality for 70 Years

"U.S." Blue Ribbon Boots are made either red or black—with sturdy gray soles—knee to hip lengths.

## It's a Brute for Wear! —this "U.S." Blue Ribbon Boot

If you want the most durable, flexible, comfortable boots and overshoes on the market, get "U. S." Blue Ribbons.

These "U. S." Blue Ribbon Boots have thick, oversize soles, tough as an automobile tire; uppers of rubber so elastic that constant bending won't crack it; reinforcements of layer on layer of strongest fabric and rubber.

When you buy boots or overshoes, look for the "U.S." Blue Ribbon. It will pay you.

United States Rubber Company

"U.S." Boots  
Walrus Arctic Rubbers  
Blue U.S. Ribbon  
Trade Mark

### Coolie Labor Not Cheap

A Chinese coolie who works for 10 cents a day is paid, according to standards of this country, 20 times what he is worth because he can only move one ton a mile in a day. American railroads move one ton one mile at a cost of only 1/2 cent. The great contrast illustrates the difference between man strength and mechanical power.

Some people are so dumb they have to have a reason for being happy.

### A Change From Home

"I wonder why three-fourths of the stenographers in business offices are women?"  
"I suppose it's because men like to feel that there is at least one class of women they can dictate to."—Boston Transcript.

### Pope's Light Breakfast

Pope Pius XI usually confines his breakfast to a small cupful of coffee and a dry biscuit, which he dips into the coffee.

## Get back that lost weight!

When you start to waste away to a shadow, when the color leaves your cheeks and your poor, tired body will hardly hold up your weakened body it's high time you started taking a fine tonic and builder like Tanlac.

Tanlac will build you up and make you feel that life's worth living. Made from roots, herbs and bark gathered from the four corners of the earth and compounded under the exclusive Tanlac formula, Tanlac is just what the poor, starved body needs.

First of all it cleanses the blood stream and puts the digestive organs in order. You find, after a few days' treatment, that you want to eat. Pretty soon the welcome color steals back into your cheeks and the scales tell you that you're gaining weight. From then on it's only a short time until you're feeling fit as a fiddle.

Millions of men and women have taken Tanlac with great benefit. More than one hundred thousand people have written us glowing tributes to this wonderful tonic. When you know it has worked wonders for so many folks it's folly not to take advantage of Tanlac's help yourself. Don't put it off another day. Get a bottle at your druggist's now and start the good work right away. Take Tanlac Vegetable Pills for constipation.

Tanlac Stops 18-Year Suffering

"Had nervous indigestion since childhood 18 years ago. Cramps day and night often lasted for hours. Since taking Tanlac have enjoyed first normal digestion and sleep in 18 years. Strength and weight increasing steadily."
