

SESQUICENTENNIAL HISTORY SKETCHES

The one hundred and fiftieth anniversary of the adoption of the Declaration of Independence will be observed by the Sesquicentennial International Exposition, which opens at Philadelphia, June 1, 1926.

SITE OF THE FIRST PHONE MESSAGE

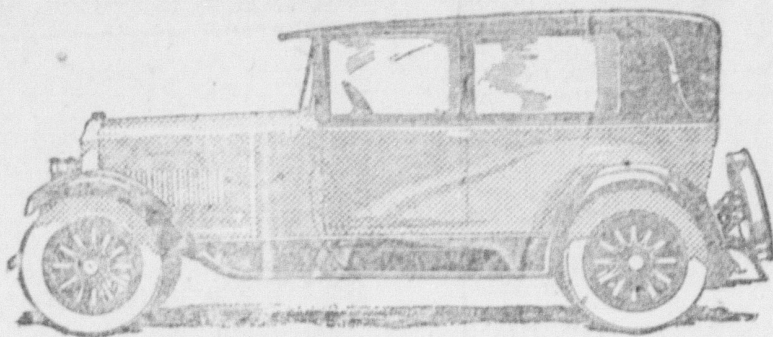

Walter S. Gifford (left), president of the American Telephone and Telegraph Company, and Leonard H. Kinnard (right), president of the Bell Telephone Company of Pennsylvania and Associated Companies, are shown standing on the exact spot where Alexander Graham Bell first talked over his invention at the Centennial Exposition 50 years ago. In the background can be seen Memorial Hall, relic of the Centennial, and which is now being used as a museum. It was on this spot that Don Pedro, then Emperor of Brazil, met the 29-year-old inventor and exclaimed, "My God, it talks!" when he heard Bell's voice come over the wire. The exhibits to be staged by the organization these men represent will be one of the great features of the Sesqui-Centennial International Exposition, which opens in Philadelphia June 1 and continues to December 1 to celebrate the 150th anniversary of the signing of the Declaration of Independence.

FROM PALETTE TO MORTAR BOARD

Young women artists turn from their jars of color and paint brushes to assist plasterers in setting ornaments in place atop huge pylons which adorn the main entrances to the Palace of Agriculture and Food Products, of the vast exhibition buildings which forms a part of the great Sesqui-Centennial International Exposition being staged in Philadelphia from June 1 to December 1 to celebrate the 150th anniversary of the signing of the Declaration of Independence. Climbing ladders and walking along rickety scaffolds is nothing new to these young ladies, but each time they do it they get a thrill.

HARNESSED POWER

Without whip or goad or sweat or strain, the STAR CAR delivers great power—constant and untiring. Power that levels hills, that ploughs through mud or sand, that shortens the miles, and lengthens daylight hours.

Hayes-Hunt Bodies—beautiful, roomy, and comfortable, make the powerful and economical STAR—either Four or Six—the outstanding buy in the low-cost field.

Cow Works Three Months to Give Year's Milk for One Person

NINETY days of hard labor on the part of the average dairy cow will keep one person in milk for a year, according to the Larrowe Institute of Animal Economics. At least, it takes three months for her to turn out the 1,000 pounds of milk necessary to provide the fluid and canned milk, cheese, butter and ice cream consumed per capita per year.

While this fact may be merely interesting to the person consuming the milk, it is of vital importance to the dairyman who depends upon this milk for a living. For while the 4,368 pounds of milk produced by the average cow in a year will meet the requirements of a family of four persons, by the time one has figured up the cost of the feed that has gone into the production, there really isn't very much left. The only way to permanently increase the income per cow is in greater milk production per unit, government figures showing that when a cow's milk yield is doubled the profit is tripled, and when the yield is tripled the profit is increased almost five-fold. Experiments have proven that it is entirely possible by better feeding and management to increase the milk yield of the average cow to a point where three cows could supply four families with milk. To do this, however, the hocus-poos feeding so commonly practiced on many dairy farms will have to give way to more scientific methods. Comfortable quarters for the cows, an abundance of fresh water at all times, a plentiful supply of good hay, and a properly balanced green ration are some of the things that go far toward securing greater profit per cow.

Jay Walker to Blame for Half of the Deaths by Auto

MANY a motorist whose car has figured in a fatal accident will be able to prove a case against Saint Peter when his time comes, when one

considers all the contributing factors outside of the driver's own fault. A total of 1,390 auto fatalities on record with the Stewart-Warner Safety Council for the prevention of automobile accidents, covering a period of seven months, shows that in 727 cases the fault was clearly the pedestrian's and cannot be put down to the driver, the weather or unavoidable circumstances.

The careless pedestrian's footsteps lead him to the grave by six distinct routes, says the Safety Council, and the most travel-worn of these is jay-walking. Sixty-two per cent of the 727 auto fatalities just referred to were due to straggling across busy streets without using the intersections. Children's playing in the streets was responsible for 31 per cent and coasting for another 3 per cent. Confusion on the part of the pedestrian, not hearing whistles and turning back in his tracks, brought about 9 per cent of these 727 deaths, while physical disability and intoxication rate 3 and 2 per cent respectively.

PUBLIC SALE REGISTER.

SATURDAY, MAY 22, at 1:00 P. M., 1½ miles east of Spring Mills, along State highway, Tamer B. Kern and J. Gross Shook, Admrs., will sell farm stock and machinery; also household goods; clean-up sale.

FRIDAY, MAY 28, at 1 P. M., at C. M. Arvey home on Church street, Centre Hall, Mrs. J. F. Lutz will sell lot of household goods, etc. E. M. Smith, auct.
