GUM-DIPPING the Extra Process for Extra Miles! Breaks all Tire Records

The 500 Mile Speed Classic at Indianapolis has always been a Battle of Tires. In 1911, Firestone won with fabric tires at 74.59 miles per hour. In 1920, Firestone won with cord tires at 88.55 miles per hour. In 1925, Firestone won with Full-Size Gum-Dipped Balloons at the record breaking average speed of 101.13 miles per hour. In 1926, Firestone again won with Full-Size Gum-Dipped Balloons. The ten cars to finish "in the money" were all Firestone-equipped. They went the distance without a single blowout and with but two tire failures—one due to a puncture and the other to a leaky valve.

The Firestone Record in Battle of Tires at Indianapolis. Table with columns: Year, Driver, Car, Tires, Miles Per Hour.

This performance is even more remarkable when you consider the terrific speeds at which the cars traveled over this fifteen-year-old, rough brick track. Experienced race drivers will not risk their lives or chances of victory on any other tires. And in the commercial field, large truck, motorbus and taxicab fleet operators, who keep careful cost records are among the big users of Firestone Gum-Dipped Tires. The City Transportation Co., of Tacoma, Wash., writes: "One of our 12 buses on Firestone Gum-Dipped Tires has gone over 40,600 miles and still looks good for many miles of extra service. For all around tire safety and mileage, Firestone cannot be beat." From Calumet Motor Coach Co., Hammond, Ind., the following: "We operate 40 buses all equipped with Gum-Dipped Tires. The very low cost per mile on which these tires operate is considerably less than that of any other make." Hayes Bus Lines, Columbia, S. C., says: "We operate 19 buses equipped with Firestone Gum-Dipped Tires. A number of these tires have run over 45,000 miles without ever having been removed from the rim." The largest taxicab companies in the world standardize on Firestone Gum-Dipped Tires. W. R. Rothwell, taxicab operator, Detroit, Mich., writes: "Two of my Firestone Gum-Dipped Tires have run 76,000 miles." Hundreds of thousands of car owners voluntarily testify to the safety, comfort and economy of Full-Size Gum-Dipped Balloons. W. H. Peacock, Birmingham, Ala., testifies: "I have had Firestone Balloons for thirteen months and they have delivered in that time 24,469 miles." H. C. Staehle, Minneapolis, Minn., says: "My Firestone Balloons have gone 49,900 miles and are still in good condition." These records of endurance, speed, safety and mileage could only have been made because of Firestone development of the Gum-Dipping process which insulates and saturates every fiber of every cord with rubber, reducing friction and heat and building greater strength and endurance in the cords—assuring you at all times—
