

ENJOY MANY COMFORTS ON CAMPING TRIP

The Morning Toilet in "Tin Can Camp."

The question, "What shall we eat, and what shall we wear, on our camping trip?" is answered in a bulletin issued by the touring bureau of the Chicago Motor club.

coffee, tea, spices, and various condiments may be carried. Pots, pans, and kettles may also be carried in the portable cabinet.

STRAIGHT SHIELD IS ALWAYS BEST

Allows Light to Travel in Straight Line and Gives True Vision.

The strictly vertical windshield is best and safest. That is the opinion expressed by Dr. Edwin H. Silver, president of the Columbia Optical company, and member of the motor vision commission of the American Optometric association.

Optics of Windshield. The optics of the windshield play an important part in the vision of the motorist. The surfaces of the glass must be parallel to each other and the thickness the same throughout.

"For this reason the windshield should be in a strictly vertical position, or at the utmost the slant should not be greater than 10 degrees. A greater slant than this causes the driver to see through an increased thickness of glass which, while small, serves to increase the internal reflections and to emphasize every defect or variation from parallelism of the surfaces of the glass.

The ideal windshield is vertical in position, of the finest and most flawless plate glass and located so as to be about 20 inches from the eyes of the driver.

"The adoption of the narrow post on each side of the windshield is also one of the most forward steps taken by the manufacturers in recent years. You can obscure the sun with a pencil and see a baseball game through a knot hole. That explains, I think, why the wide post, with its greatly increased "blind spot" is so much more of a menace than the narrower post."

Avoid Left Side of Car When Stopping on Road

When stopping along the road don't sit on the left side of the car to rest. One is likely to get out of the car to stretch and get struck by objects protruding from trucks and other cars. Most drivers will pass closer to a car that is stopped.

If camping and using the battery for lighting, park the car on a slight downgrade and block the wheels. When you are ready to go crank by allowing the car to coast in gear, thus saving the battery and starter.

The TALE of KIDDIE KATYDID by Arthur Scott Bailey

THE BEST OF FRIENDS

IN SPITE of his lengthened horns. Leaper the Locust hardly dared show himself while his cousins remained in the neighborhood.

"Don't You Know Me?" He Asked.

me," he remarked to a long-horned gentleman who stopped to talk with him one evening. "But of course," Kiddie added with a smile, "that's out of the question."

Oratorios Won Fame

The first oratorio of George Frederick Handel, greatest of all composers of that style of music, was given its initial performance 222 years ago, when the youthful composer was in his twentieth year.

met anybody so agreeable as you are." The stranger drew nearer and lowered his voice. "Don't you know me?" he asked. Kiddie Katydid stared at him for a moment.

"I'm never going to be a Short-horn again!" he declared. "I shall wear my horns long to the end of my days."

Luckily the grasshopper horde soon swept on to new fields. And a few warm rains, with sunshine sandwiched in between showers, soon turned the countryside green again.

WHEN I WAS TWENTY-ONE by JOSEPH KAYE

At Twenty-One:—Sir Arthur Conan Doyle Was a Surgeon on a Whaler.

"AT THIS time I paid a seven-months' visit to the Arctic seas. I went in the capacity of surgeon on the ship Hope, under the command of the well-known whaler, John Gray.

"I went on board the whaler a big, straggling youth; I came off it a powerful, well-grown man. I have no doubt that my physical health during my whole life has been affected by that splendid air, and the inexhaustible store of energy which I have enjoyed to some extent drawn from the same source.—Arthur Conan-Doyle."

TODAY—Conan Doyle, if not the inventor of the detective story, is the author who brought it to the highest peak of popularity and scientific interest. His character, Sherlock Holmes, is now a household name.

The famous author practiced medicine for eight years, and it is to his scientific training that a great measure of the realism of his stories is due.

Kathryn Perry

Perhaps no other "movie" actress has more admirers than Kathryn Perry, the charming leading comedienne. She has brown hair and gray eyes. She has scored a greater success on the screen than she did in the Follies. Everybody likes her work.

How It Started by JEAN NEWTON

THE "BRAND" OF DISHONESTY

WE FREQUENTLY speak today of the "brand" of ignominy, the "brand" of dishonor or of shame with reference to stigmas that are not visible and which leave no marks.

The offenses for which early seekers after freedom on American soil were branded with iron, as today only cattle are branded, are innumerable. Among them were such heinous crimes as criticism of the government or insubordination against constituted authority.

"The Drum was Beat, the People gathered. Norton was fetched and stripped to the waste, and set with his back to the Magistrate, and given in their View Thirty-Six cruel Stripes with a knotted cord, and his hand made fast in the stocks, where they had set his Body before, and BURN'D VERY DEEP with a RED-HOT IRON WITH H. FOR HERESIE."

As Told by Irvin S. Cobb

STICKLER FOR THE CODE

A SURVIVOR of Mosby's cavalry told me this one, years ago as illustrative of the German's love for regularity and orderly routine in all the affairs of life.

It would seem that a Bavarian immigrant joined a Union regiment and in the third year of the war was sent to Virginia. One night he imbibed too heavily of strong drink and fell asleep in a corn crib. When he awakened he discovered that during the night a negro camp follower had stolen his uniform, leaving behind a ragged civilian outfit. The German clothed himself in these tatters and set out to find his command.

Presently another and an even more disagreeable circumstance than the theft of his wardrobe impressed itself upon him. By certain signs he was made aware that while the federal forces had withdrawn from their old positions the enemy had advanced so that he was now inside the foe's lines.

As he limped toward the rear hoping to overtake the retreating force, a squad of ragged gray troopers came whirling out of a thicket and surrounded him. Quite frankly he told them who and what he was, and they made a prisoner out of him.

Presently his captors halted him where a tree limb stretched across the road, and one of the southerners, unshipping a plow line from his saddle bow, proceeded to fashion a slip-noose in one end of it. The captive inquired of the lieutenant in command what the purpose of all this might be.

"Why," said the lieutenant, "we're going to treat you as we would any Yank caught inside of our lines in disguise. Under the laws of war we're going to hang you as a spy."
