

## "BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told in "Bayer" Package

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

- |           |            |
|-----------|------------|
| Colds     | Headache   |
| Neuritis  | Lumbago    |
| Toothache | Rheumatism |
| Neuralgia | Pain, Pain |

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Drug-gists also sell bottles of 24 and 100.

Many a man has noble aims—but it is the hits that count.

**Cuticura for Pimply Faces.**  
To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

There are times when it is safer to fool with a bee than to be with a fool.

## Keep in Trim!

Good Elimination is Essential to Good Health.

THE kidneys are the blood filters. If they fail to function properly there is apt to be a retention of toxic poisons in the blood. A dull, languid feeling and, sometimes, toxic backaches, headaches, and dizziness are symptoms of this condition. Further evidence of improper kidney function is often found in burning or scanty passage of secretions. Each year more and more people are learning the value of Doan's Pills, a stimulant diuretic, in this condition. Scarcely a nook or hamlet anywhere but has many enthusiastic users. Ask your neighbor.

## Sure Relief

There are two varieties of white geese, the Emden and the Chinese. They are both large varieties. The Emden, however, is more common and more generally raised for market than the Chinese. There is little difference in the two kinds as to the hardiness. It is generally believed that the Emden are a little more domestic than the Chinese. The Chinese are the ones which have a knob on the head at the base of the beak.

## Eradication of Tubercular Hogs

Noticeable Decline of Disease in Swine Reported From Iowa.

(Prepared by the United States Department of Agriculture.)

With current progress in eradicating tuberculosis from cattle, a noticeable decline of the same disease among swine is taking place. This announcement by the bureau of animal industry, United States Department of Agriculture, is based on field observations and by records of the federal meat inspection service.

### Economic Loss.

A striking example of the effect of the work has been received by the department from an Iowa packing company which has "kept books" on such losses for the last seven years. In 1910 the average loss per hog caused by tuberculosis infection was 75 cents. This figure is the economic loss for hogs slaughtered in the plant. In 1920 the loss declined to 66 cents, in 1921 to 49 cents, and in 1922 to 32 cents. Since 1913 the loss has declined further to 26 cents.

"We have actual knowledge, through experience," the company adds, "that the tuberculin test applied to cattle has reduced bovine tuberculosis among cattle and hogs following them, and has cleaned up the hogs from the disease."

### Report for Hardin County.

Further evidence is given by the packer's report for Hardin County, Iowa, which is an area accredited as free from bovine tuberculosis. During a nine-month's period more than 11,000 hogs were shipped from this county and slaughtered, with an average economic loss, caused by tuberculosis, of only 47 cents each. This figure is less than a fifth of the general average, which in turn is about a third of the loss in 1919 when systematic tuberculosis eradication was just begun.

An important development of the work is the discovery that throughout the Central West especially, many poultry flocks are tuberculous, and some infection among swine is traceable to that source. Fowl tuberculosis yields readily, however, to methods of control and eradication. Thus the outlook for the complete suppression of tuberculosis among all kinds of live stock is encouraging, federal veterinary officials assert.

## New Strain of Cabbage Is Resistant to Disease

Cabbage growing on a commercial or lesser scale in the corn belt has been seriously hampered the last few years by a disease known as cabbage yellows which lives over in the soil for as long as 11 years and causes from a half to almost total loss of the crop.

Various attempts to control the disease by soil treatments or crop rotation have failed, but a strain has recently been developed by the Iowa Agricultural Experiment station, Ames, which seems to be quite resistant. In various trials on infested soils it has produced satisfactory crops during the past two years. The strain is called Iscopes and was bred up from the Copenhagen Market variety. Bulletin No. 235 describes this strain.

### Meat Scrap in Ration

Meat scrap or some other animal feed high in protein is one essential constituent of the mash. In some experiments a pen of pullets, on free range, which did not get meat scrap or any other protein feed, laid only 90 eggs each in a year, compared with yields of from 125 to 150 eggs from pens fed rations containing meat scrap. The eggs from the pen where no meat scrap was fed cost 2.2 cents more a dozen for feed. Eggs add to the return from the farm.

### Good Hog Pasture

A good pasture for hogs is oats and rape, sowing the oats at the rate of about one bushel per acre, and following with Dwarf Essex rape, at the rate of about five or six pounds per acre is favored.

It is a good plan to sow the rape separately, following the oats, giving them a light harrowing, if it is desired. Many hog lots or barn lots can be plowed up and sowed to rape very profitably. In this way all available ground will be utilized.

### Pasture for Ducks

As to a good pasture for ducks, short bluegrass is good, but, better yet, short alfalfa or clover. For egg production supply a ration of three parts corn meal, three parts finely ground oats, three parts wheat bran and one part fine flour middlings. Add to every 100 pounds of this mixture one pound of fine sand, two pounds of grit and fifteen pounds of beef scraps. If they are on pasture no other green food will be needed. They do not need running water.

### Breeds of White Geese

There are two varieties of white geese, the Emden and the Chinese. They are both large varieties. The Emden, however, is more common and more generally raised for market than the Chinese. There is little difference in the two kinds as to the hardiness. It is generally believed that the Emden are a little more domestic than the Chinese. The Chinese are the ones which have a knob on the head at the base of the beak.

## American Flowers to Bloom at Stockholm

Flowers from Yellowstone park will soon blossom in the royal gardens of the Swedish capital, according to word received in Washington by the United States national park service from Prof. H. S. Conrad of Grinnell college, director of the lecture and nature guide service in the park. During the recent tour of Crown Prince Gustavus Adolphus and his consort through Yellowstone National park, Professor Conrad was detailed to accompany the royal party and to give the prince, whom he found to be an enthusiastic and well-informed botanist, the benefit of his intimate knowledge of the mountain flora. Professor Conrad has shipped to Stockholm a collection of the rarer species of Yellowstone plants, not as yet represented in the royal herbarium, and he has also sent seeds of a number of the choicer flowers which, it is hoped, will become permanent American representatives at the Swedish court.

### How Times Change

Jean, age ten, living in Park avenue, has been in the habit for several years of visiting her cousin Oliver in the country for a week each summer. This summer she said nothing about going. She showed none of her former enthusiasm for making the journey, and finally her mother said: "Well, Jean, how about the visit to the farm this summer?"

"Oh, I can't think I'll go," she replied.

"Why not?" asked the mother.

"Well, it's not the same town there since the goat died," she said.—Indianapolis News.

# FISHER BODIES

GENERAL MOTORS

## THE INEVITABLE BODY ON THE QUALITY CARS

There could be no greater proof of Fisher quality than the selection of Bodies by Fisher for all of the leading makes of cars, in all price divisions.

Fisher Bodies have been exclusively adopted for all divisions of the General Motors Corporation, for instance.

And whether your selection be Cadillac, Buick, Chevrolet, Oakland, Oldsmobile or Pontiac, on every General Motors car you find a body with all of the inbuilt factors of safety, comfort and convenience which have

made a Body by Fisher the standard of highest quality the world over.

New products of General Motors have just been announced.

As you consider their greater merits we ask you to give particular attention to their exclusive use of Bodies by Fisher.

The latest Fisher creations set the new General Motors cars as far ahead in safety, comfort, beauty and convenience as any mechanical improvements could possibly do.
