

## HOW I IMPROVED MY HEALTH

Did It in Less Than One Month

"As Mrs. Weaver herself says, 'I was never very strong.' This is a mild statement describing her condition, for, according to her letters, she was subjected to no small amount of ill health. Fortunately, her sister was familiar with Lydia E. Pinkham's Vegetable Compound and begged Mrs. Weaver to try it. 'After three or four weeks,' writes Mrs. Weaver, 'I felt a great difference in myself. I would go to bed and sleep soundly although I could not do very much work. I seemed stronger. I kept on taking it and now I am well and strong, do my work and take care of three children. I sure do tell my friends about your wonderful medicine, and I will answer any letters from women asking about the Vegetable Compound.'—Mrs. LAWRENCE WEAVER, East Smithfield St., Mt. Pleasant, Pa.

If you knew that thousands of women suffering from troubles similar to those you are enduring had improved their health by taking Lydia E. Pinkham's Vegetable Compound, wouldn't you think it was worth a trial? In some families, the fourth generation is learning the merit of Lydia E. Pinkham's Vegetable Compound.

## Uniform Marking System Is Urged

Plan Would Reduce Errors in Regard to Ownership to Minimum.

(Prepared by the United States Department of Agriculture.)

Marketing of live stock in co-operative shipments is a very important feature in conducting the business of the shipping association, especially if the stock is to be sold according to ownership or if the commission firm is expected to prorate the returns to each owner. It would be advisable to establish a uniform system of marking live stock for use by all associations in the country, says the United States Department of Agriculture. Such a plan would reduce errors in regard to the ownership to a minimum. A system of marking which is suitable to the needs of all associations has been suggested, and is, briefly, as follows:

**Mark Cattle and Calves.** Cattle and calves would be marked by using shears to clip four-inch Roman numerals on one hip, preferably the right hip. Only the first ten numerals would be used. A single bar, like a minus sign, placed before each numeral would raise the number by ten. Two parallel bars before each numeral would raise it by 20. Thus V, —V, =V, would mean 5, 15, and 25, respectively.

Hogs are marked by clipping the numerals on the top of the shoulder, back, or rump, using only such combinations as can be made with four marks or less. Or they may be marked on the side of the shoulder, body, or ham, in which case not to exceed three marks would be used. Shears with curved blades about eight inches long, commonly called "roaching shears" are most generally used for marking.

**Fluid for Sheep.** Sheep are marked by using branding fluid applied with a half-inch stiff round-bristle brush. The marks should be placed on the head, top of shoulders, back, or rump. In no case should paint be used for marking any kind of live stock. It is detrimental to the wool of sheep and unsatisfactory on hogs because it smears.

## Cut Alfalfa Soon After It Lodges, Says Expert

Just what is the best time to cut alfalfa for hay, all things considered, is a problem which farmers and agricultural experiment station workers have not definitely solved, according to A. C. Army, field crops specialist of the Minnesota Agricultural Experiment station in a talk before a group of scientists at the Minnesota station. About one thing, however, Mr. Army was emphatic, and that was that alfalfa should be cut very soon after it lodges, as it does generally in Minnesota. The reason for this is that when the crop lodges the leaves underneath turn yellow and fall off and the hay produced is decidedly inferior. In 1924 alfalfa cut before lodging retained 50 per cent of its leaves, while alfalfa cut after lodging retained only 24 per cent.

Mr. Army, therefore, advises the immediate cutting of alfalfa that has lodged, even if it is only in the bud stage.

## Blindness in Hens

Hens may become blind due to bits of foreign material lodging around the eyeball and starting irritation, or it may be due to ocular roup. Most forms of colds and roup cause more or less trouble in the eyes of the bird. The blindness and weakness may be the symptoms of some disease. Sometimes a hen gradually becomes blind, due to causes which it seems almost impossible to determine. In such cases the only remedy is to kill the bird.

## Farm Hints

Plow early and deep for big wheat yields. If you plow late, don't plow so deep.

Cattle should be blanketed for a period of six weeks prior to showing them at the county fair.

It usually pays to spray potatoes even though there may not be any conspicuous blight on them.

Keep the hoops on the silo tight. A heavy shower when there is no silage in it may pile the whole thing in the silo pit.

A stitch in time saves nine—cut one cockle burr this year instead of nine next summer. The same rule works for sunflowers.

Keep weeds out of strawberry beds so the plants can grow well. Next year's crop depends much upon the care the plants receive this summer and fall.

Young chickens should have plenty of range and roosting space if they are to make good gains. Food will not compensate for scanty quarters, especially if they are to be breeding stock.

A root storage cellar is an essential part of the farm equipment. A bulletin put out by the New York state college of agriculture describes the construction and management of them. Ask for it by number—E 22.

## Settles Auto Disputes

Judge David J. Hefferman of Miami's night municipal court in Florida has an array of tiny motor vehicle models which fulfill an important role in his proceedings. A dispute in traffic disturbances calls forth the models and the motorist re-enact the scene in question before the judge on one among several drawings, representing various streets scaled to the size of the miniature autos.

## Say Mass in Honor of Spirits of Elephants

A Buddhist mass was recently held in Tokyo for the spirits of all elephants that have supplied ivory for ivory carving in Japan. Members of the Tokio Art Objects Dealers' association and ivory carvers assembled at Kokoku temple for the ceremony. Fifteen prizes opened the service with the reading of Buddhist prayers. A large monument was also unveiled in honor of the spirits of the departed elephants. The president of the association said: "We who obtain our living from this ivory cannot help feeling grateful to the elephants which have been furnishing materials for us to work with. It is for this reason that we comfort their spirits by holding a mass for them. We think we also do honor and comfort to the spirits of our ancestors, who were likewise in the ivory trade. We wish all artists and dealers in ivory objects to visit the monument as a shrine when they come to Tokyo."—Pathfinder Magazine.

## New Cable Intricate

In the last two years two new telephone cables have been laid between England and the Netherlands. The cables are 705 kilometers long, and each weighs about 1,100 metric tons. They consist of four wire groups and a great artery. The core is 25 millimeters in diameter, surrounded by a leaden cover, making the entire diameter 54.5 millimeters.

### Convenient for Autoists

With every car sold a Paris automobile dealer supplies a pot of special paint and a sprayer, about the size of a fountain pen, so that scratches and nicks can be touched up at once to keep the body looking new. Pressure for applying the paint is obtained by blowing through a tube connected with the sprayer. While the preparation is specially adapted to covering metals, it also may be used on fabrics and leather.

### Public Lands in Nevada
