- Tabouretts
- Buffets
- Etc., Etc.

F. V. Goodhart, Centre Hall

HOG prices in 1925, according to a market analysis by the Sears-Roebuck Agricultural Foundation, have been the highest since 1920 and the number of hogs slaughtered nearly 20 per cent less than in 1924 and 1923, when production was at a record level. With prices approximately 50 per cent higher this year than last year, hog producers have had an especially profitable season. The range of prices has run from \$10 to almost \$14.50 per hundred pounds, the peaks being reached in March, July and September. The ratio between prices of hogs and corn prices turned favorably for the feeder last spring and is now the best that it has been since 1922. Last spring's pig crop in the corn belt, which is now coming on the market, was estimated to be 10.6 per cent less than the pig crop of the spring of 1924. This indicates that rather high prices are likely to be maintained during most of the 1925 season, unless a very large crop of hogs is produced and pushed rapidly into the markets. Excepting the months of January and February, receipts at the eleven leading markets of the country have gone below the 675,000 level and from June to October have been below the 550,000 mark.

POTATOES were a very profitable crop in 1925, according to a survey made by the Sears-Roebuck Agricultural Foundation. The acreage was the smallest since 1919 and the yield the lowest since 1917. Following four years of overproduction and very low prices, the 1925 season started off with a good price, which increased daily. The peak will be reached in spring shipments. The annual consumption of 3 1/4 bushels per capita, including seed, is 370,000,000 bushels. The 1925 crop is estimated at 323,243,000 bushels or 46,757,000 bushels under normal consumption. The 1925 crop is 24 per cent less than the crop produced in 1924, but the ratio of consumable potatoes for the two years may vary still more in favor of the 1925 crop. With the acreage cut severely all over the country in 1925, the opening prices started out on a higher scale than the peak prices for 1924 and began to increase at digging time until they reached in some instances \$3.50 and \$4 per hundredweight at local shipping stations. Every grower should save seed per hundredweight at local shipping stations. Every grower should save seed for next spring, as all indications point to high-priced seed potatoes for 1926 with an exception that the acreage planted will be larger in 1926.

MAIL ORDER PRICES BEAT

YEAGER'S TINY BOOT SHOP.
BELLEFONTE, is in position to sell SHOES and all kinds of RUBBER FOOTWEAR FOR LESS PRICE than any Shoe Store or Mail Order House in the United States.

WHY?

This is the reason. Our daily expense of operating this tiny store is only 52c day. FIFTY CENTS profit on a pair of shoes or rubbers means as much to us as \$2.00 profit in the large store. The other goes to pay large rents, clerks and other expenses that this hole in the wall shoe store does not have.

GIVE US A CHANCE TO PROVE IT.
