Haag Vortex Washer for Town or Country Home

THE ELECTRIC MODEL 60E is well known and is made for homes where electric power is convenient. We will be glad to demonstrate it at any time.

Those homes which have no electricity to operate the Haag Vortex electric model, nor a stationary farm engine to operate the Haag Vortex Beltpower, can now have the entirely independent

HAAG VORTEX OWNPOWER with built-in gas motor

The OWNPOWER unit is a four-cycle gasoline motor carefully built into the HAAG VORTEX to replace the electric motor. It has striking advantages over the ordinary two-cycle gasoline motor.

FOR INSTANCE—1. The OWNPOWER does not leak grease on the kitchen floor as a 2-cycle unit has a tendency to do.

2. The OWNPOWER starts easily—with a rope pull which spins the motor instead of merely turning it over as a foot starter does.

3. The OWNPOWER has a tendency to start more easily under all weather conditions than a 2-cycle unit, because the oil and gasoline in the Ownpower unit are separate; the Ownpower can be started even when the carburetor is flooded, but the two-cycle unit cannot be.

4. There are no batteries nor switches on the OWNPOWER to get out of order. The rope-pull starter on the OWNPOWER is entirely safe—no danger of injury by kickback.

5. The OWNPOWER has a great deal more power than is necessary for operating the Haag Vortex.

6. The OWNPOWER uses about 20 per cent. less gasoline and 50 per cent. less oil than a 2-cycle unit.

We'll be glad to bring this Washer to your farm home for a demonstration. Just let us know when.

Higher Quality at Lower Prices Because of increasing Volume Production

January, 1925—There was introduced a new Chevrolet which scored a tremendous success. Among its many new features were: a new rugged rear axle, an improved unit power plant, a new single-plate disc-clutch, a much stronger frame, semi-elliptic chrome-vanadium steel springs, cowls and dash-lamps, and new Fisher bodies finished in Duco.

August, 1925—Chevrolet announced a new measure of value based on many new quality features—such as motor-driven Klaxon horns, improved sheet metal construction in the bodies, corrugated steering wheel with walnut finish, new headlamp rim construction and a more convenient gear-shift lever. Yet despite all the additions . . . the price of the Coach was reduced to (f.o.b. Flint, Mich.) \$735

January, 1926—Another spectacular increase in Chevrolet value—a model offering many mechanical improvements, such as a smoother, quieter motor with three-point suspension, a silent V-belt generator drive, new oil pump, more efficient cooling, an air cleaner, larger brakes, etc. Notwithstanding these improvements . . . the Coach was reduced to (f.o.b. Flint, Mich.) \$645

— and now —

The Most Beautiful Coach In Chevrolet History!

Climaxing all of Chevrolet's previous value triumphs, the Chevrolet Coach of today is acclaimed as the outstanding closed car value of all time. Beautiful new Fisher bodies—painted and beaded, rakishly low and finished in new colors of genuine Duco . . . full-crown, one-piece fenders . . . bullet-type headlamps . . . AC oil filter and AC air cleaner . . . finer performance, greater riding comfort and remarkable steering ease! A car so marvelously beautiful that you must see it to appreciate it.

— Yet the price has been reduced to . . . \$595 (f.o.b. Flint, Mich.)
