NASH
Leads the World in Motor Car Value
You can see why Nash has extra power

The extra power that makes Nash a more capable car to drive, particularly on the hills or in dense traffic, is directly due to extra-efficient design.

The Nash Straight Line Drive, for instance, diagrammed above.

Nash power flows directly from the engine to the rear axle in a straight line. There are no angles along the route to waste energy, as there would be if the motor were mounted parallel to the frame, as the ordinary motor is.

The Straight Line Drive accounts in part for Nash aggressiveness—for the powerful

pick-up at low speeds (where you need it most). You will always notice it is the Nash that gets away soonest when the traffic starts.

The Straight Line Drive also avoids wear on the universal joints, and thereby prevents noise and looseness.

Of course, it takes a little longer and costs more to build Nash this better way—

—But any Nash owner will tell you it makes a lot of difference in the results he gets.

Drive a Nash, before you decide which car to buy!

Your Personal Operator..

TELEPHONE SERVICE is not produced for delivery in bulk, or in standard packages over the counter.

Every call is turned out "to order"—a custom service designed to meet personal needs, at a moment's notice.

Your telephone operator is a multiple personality.

She sits at many switchboards—Local, Toll, Long Distance, Information, Changed Number and the rest—with signal lines to her sisters "at the other end," ready to set the track for any journey you select.

To her, your call means more than just a combination of switchboard manipulations.

It is a call for personal service, to be answered, completed and supervised as your personal clerk or secretary would handle it.

That is the aim of our operating force.
