Reports from farmers who have threshed a portion of their wheat crop indicate that the yield will be very fair judging from the good run from the threshing machine spout. The yield per acre can not be given since none of the farmers have completed threshing.

John F. Foreman, of Cresson, is the champion long-distance subscriber on the Reporter's subscription list. A check received from him on Monday places the Reporter in debt to him until February, 1934. What faith our good friend has in the Reporter's carrying on in these strenuous days! Mr. Foreman is a superintendent of coal operations in Cambria county, and says: "We are still on strike and it keeps me rather close to the works as we have only the pumps working."

Oats harvest is on, a few farmers having cut the crop during last week. The harvest is at least a week later than last year. The crop generally speaking is good, nearly all fields having an abundance of straw. Farmers who have carefully examined the crop report that no bumper yield in bushels need be looked for owing to the fact that a considerable portion of the heads have deaf kernels on them. The straw stands up well, and if favorable weather follows the cutting the crop will go a long way toward furnishing feed for all farm animals.

The old I. O. O. F. hall in Millheim, recently purchased by John W. Klinefelter, is being converted into a double dwelling house. Carpenters are now at work there.
