

Keep Your Butter Uniform and Hold Your Customers

Don't wait for your customers to complain about the variable color of your butter. Keep your butter that golden June color everybody likes by putting a few drops of Dandelion Butter Color into the churn. It is purely vegetable, wholesome and absolutely tasteless. It meets all State and National Food laws. All large creameries have used Dandelion Butter Color for years. It does not color buttermilk. You can get the large bottles for 35c from all drug or grocery stores.

AUTO WRECKER IN FORM OF LOCOMOTIVE

The photograph shows the latest in odd automobiles. It looks like a locomotive, but really is only an auto wrecker. It has head lights, a bell, and an air whistle. The exhaust goes out through the smoke stack, and the wrecking crane is in the tender at the rear.

RACING TRAINS PUT UNDER BAN

Minnesota Law Requires Drivers to Come to Full Stop at Crossings.

Motorists who try to beat the train to the crossing will face a new risk under the new Minnesota traffic code. Even if they get across the track safely—which many do not—they may face a jail term or fine, for the new law requires drivers to come to a full stop at grade crossings "wherever a clearly visible and positive signal gives warning of the immediate approach of a railway train or car." The same law applies to motormen where a street car line crosses a railroad. Failure to stop is a misdemeanor.

Stop at Crossings.

This new provision is in addition to the old law requiring all drivers to stop at all times at designated "stop" crossings. Another old law which is retained requires drivers of vehicles carrying school children, passengers for hire, explosives or inflammable liquids to stop at all grade crossings.

Here are some other provisions of the new Minnesota code.

On all highways of sufficient width all vehicles must keep to the right of the center of the roadway, and slow moving vehicles must keep near the right curb. This does not apply to one-way streets, where keeping to the right is impractical, or when overtaking other vehicles.

In crossing railroads or highway intersections, the driver must always keep to the right, unless the right half of the road is obstructed or impassable.

Drivers of vehicles going in opposite directions shall each give the other at least half the road.

A driver passing a vehicle shall not go to the left of the center line of the road unless such left side is clearly visible and free of oncoming traffic to permit him to pass the vehicle safely.

Must See Ahead.

A driver shall not overtake and pass a vehicle upon the crest of a hill or on a curve where he cannot see the road 500 feet ahead.

A driver shall not overtake and pass another vehicle on a railroad crossing or highway intersection, except when such intersection is controlled by a traffic officer or automatic signal.

The driver of a vehicle passing another vehicle shall pass at a safe distance to the left, and shall not again drive to the right of the road until safely clear of such vehicle.

Speeding up to prevent another vehicle to pass is prohibited in the new code. It provides that the driver of a vehicle about to be overtaken and passed "shall give way to the right on suitable and audible signal being given by the driver of the overtaking vehicle and shall not increase the speed of his vehicle until completely passed by the overtaking vehicle."

Increasing Number of Automobiles in Japan

With the increasing number of automobiles in Japan, it is almost as unsafe to cross a street in Tokyo or any other large city as it is in New York. Half of the automobiles in Tokyo either killed or injured some one during the past year, according to police statistics.

There are approximately 13,000 motor cars in the Japanese capital. During 1926 there were 6,368 automobile accidents reported in which some one was killed or injured.

There were 16,282 traffic accidents in which 234 persons lost their lives and 9,871 were hurt. Of the total number of accidents, bicycles were responsible for 5,752, tram cars for 1,445 and the innocent looking rickshaw for 103.

Refrigerator Trucks Gain

When the refrigerator car came to the railroads, long-distance shipping of meats and other perishable products was made possible, and all-year-around vegetables became common on the dinner tables of the nation. And now, with a network of busy highways filling in the gaps between the railroads, and with farmers being pushed farther from their markets by the pressure of suburban expansion, the motor truck refrigerator promises to become a major development.

Keep Umbrella Off Heater in Your Car

If you want to avoid a blaze in your automobile, refrain from placing an umbrella over the heater on the floor of your car, warns the National Safety Council. Many umbrellas have handles, tips or rings made of celluloid which may ignite as a result of carelessly putting them too close to heat. People shouldn't place umbrellas close to stoves in their homes or offices either, continues the bulletin issued by the accident prevention association, which has received reports of explosions following such habits.

Useful Hammer for Use on Polished Surfaces

It is impossible to hammer on a polished wooden or metal surface without making dents. An ordinary hammer will never do the work unless the head has been padded in a suit-

Rubber Tip on Hammer Head.

able manner. The kind shown in the drawing will be found satisfactory. Purchase a rubber crutch tip and force this over the head. Now you can do the work without any danger of marring the finish.—Popular Mechanics Magazine.

Motor Buses Useful to Transport Race Horses

Those who "follow the races" can appreciate the great care required in handling the nervous, high-spirited race horses, easily thrown off their mettle by the slightest discomfort.

The problem of transporting such thoroughbreds has been solved in England, where the pullman motor horse box car is rapidly being adopted as the ideal vehicle for moving blooded stock.

Horses can be loaded into the pullman at their own stables, taken direct to the race course and unloaded there, avoiding the noise, bustle and excitement of railway stations, and the delays and shunting so common to steam travel. In addition, the horses are transported from race to race among familiar surroundings and with all the comforts of their home stables. Their groomers ride in an adjacent compartment, and can keep a careful watch over them at all times.

The specially constructed body accommodates two horses with groomers and equipment.

AUTOMOBILE NOTES

The campaign against the fellow who lets his car stand in the street all night, and saves battery by refusing to turn on a parking light, didn't start any too soon.

An automobile that burns wood instead of gas has been tried out in France. But it ought to be just about as easy to crank one on a cold morning as it would be to have to start a fire in it.

The car that always appears new is groomed as carefully as a race horse each time it is put into the garage and taken out. Leaving ice, snow, mud or water on it destroys the luster of the finish.

THE NEW ERA IN TELEPHONE COMMUNICATION

Protection for Your Service

BLAZING trails over mountain ranges, cutting through forests, then out upon the highways—

Hardy construction "gangs" are replacing the old-time open-wire lines with cables—on short, sturdy poles.

The larger centers are now connected by these storm- and trouble-defying avenues of communication.

Last year nearly seventy thousand miles of wire in cables alone were

added to the Bell toll lines in Pennsylvania.

The old enemy of telephone service—sleet storm—is being outgeneraled.

And with a 17% improvement in maintenance, service interruptions are approaching the vanishing point.

Dependability and freedom from interruption are keeping pace with the increased speed of your out-of-town calls.

It's part of the new era in telephone communication.

THE BELL TELEPHONE COMPANY OF PENNSYLVANIA

Farms Raise Own Gas

Farms may be made to produce their own gas for use in cooking, heating and lighting, according to the inventor of a generator that makes gas from the waste products of the farm. Cotton, cornstalks, straw and sawdust have been employed successfully, says Popular Mechanics Magazine, a ton of material producing about 1,000 cubic feet of gas.

Reason is the hardest thing to apply to jealousy.

BREAKS A COLD IN TWO MINUTES

Muco Salve 25 cts. at Drug Stores First time you sneeze get a bottle of Muco Salve. Place a little in each nostril or melt a little in spoon and inhale fumes. Clears the head instantly. Often breaks the cold in two minutes.

If cold has gotten down in your chest, get a bottle of MUCO SOLVENT, (liquid) 75 cents. It dissolves the phlegm. Clears the chest. Thousands say it is the best cold remedy ever known.

Have a lovely Complexion

You can make and keep your complexion as lovely as a young girl's by giving a little attention to your blood. Remember, a good complexion isn't skin deep—it's health deep.

Physicians agree that sulphur is one of the most effective blood purifiers known to science. Hancock Sulphur Compound is an old, reliable, scientific remedy that purges the blood of impurities. Taken internally—a few drops in a glass of water, it gets at the root of the trouble. As a lotion, it soothes and heals.

60c and \$1.50 the bottle at your druggist's. If he can't supply you, send his name and the price in stamps and we will send you a bottle direct.

HANCOCK LIQUID SULPHUR COMPANY Baltimore, Maryland

Hancock Sulphur Compound Ointment—60c and 50c—for use with

Hancock Sulphur Compound

HALE'S ONEY At the first sneeze, banish every symptom of cold, chills, etc. with HALE'S. Relief at once—Breaks up cold positively. 30 cents at all druggists.

MOREHOUND & TAR

GETS VAST ESTATE

Doris Duke, fourteen-year-old daughter of the late J. B. Duke, millionaire tobacco king, who has received the vast estate of more than 3,000 acres near Somerville, N. J., willed to her by her father. A deed for the property, estimated as being worth more than two and a half million dollars, has been filed in Miss Duke's name.

Fisherman's Luck

As was to be expected, an automobile driver recently evaded the speed laws on the protest that he was another of the now many "dawn-to-dusk" drivers.

As the traffic officer approached the speed car the driver yelled back without stopping, "this is the first town I have passed through in my dawn-to-dusk trip from the mountains to Wilmington that the courtesy of a motorcycle officer to escort me through the town was not extended." Obviously, the officer apologized and the driver dashed on to his fishing, greatly pleased with his deceitful triumph over the law.—Charlotte Observer.

Foreign Judges for Stock Show

When the International Live Stock exposition is held in Chicago, November 28 to December 3, two distinguished foreigners will be there as judges. Lieut. Arnold Caddy (left), president of the Australian Red Polled Breeders' association, and one of the leading judges of many kinds of live stock in his native country, will make the official awards in the Red Polled breeding classes. Walter Biggar (right), Dalbeattie, Scotland, will assume the responsibility of officially judging all of the fat bullocks and selecting the grand champion steer.

Rogues' Gallery Methods at Drake

Every student at Drake university in Des Moines, Iowa, posed for a picture this fall before completing registration, in order that a photographic record of all students may be kept in the university files. They do the same thing at the state prison when "students" enroll there.
