GIRLHOOD TO

Iowa Woman Found Lydia E. Pinkham's Vegetable Com-pound Always Helpful

Vinton, Iowa.—"When I was seven-teen years old I had to stay at home from school.

I finally had to quit school, I was so weak. I suffered for about two years beore I took Lydia E. Pinkham's Vegetable Compound, then I picked up one of your books and read it. I began taking the medicine. Now I am a ousekeeper with

six children, and I have taken it before each one was born. I can-not tell you all the good I have re-ceived from it. When I am not as well as can be I take it. I have been doing this for over thirteen years and it al-ways helps me. I read all of your little books I can get and I tell everyone I know what the Vegetable Compound does for me."—Mrs. Frank Sellers, 510 7th Avenue, Vinton, Iowa.

Many girls in the fourth generation

are learning through their own personal experiences the beneficial effects of Lydia E. Pinkham's Vegetable Com-pound. Mothers who took it when they were young are glad to recommend it to their daughters.

For over half a century, women have praised this reliable medicine.

is shown by the fact that this country suffers a loss of millions of dollars every year in its world trade because of delays and losses due to the inequality between our standards and the metric standards of other nations and the difficulty in translating one in terms of the other. The purpose of the proposed metric standards bill, as stated by Congressman Britten, is to give to Americans "the world language of quantity," It proposes to establish a standardization of terms, so that our units of weights and measures may be alike and invariable throughout our land, and also fortu-

the world at large. The advance to the metric system under this bill wili not so much affect the making of things as it will govern the merchan-

dising of things by measure. In contrast to our present standards, which are complex and unrelated, the metric system is simple and: based upon the decimal system like our currency, its units are logically inter-related. There are three fundamental units, the meter, the liter and the gram, and all three are decimally divided or decimally multiplied. Both multiplication and division are automatic. You move the decimal nately in accordance with those of point and-presto! you have it.

Record Tree Planting

The need for a new set of standards

their relations to each

that for all of them,

person. And if you

other? If you can do

you're a most exceptional

should set out to learn them-beware!

It was Sir Hiram Maxim, the great

inventor, who once said, "I cannot un-

derstand why we stick to these weights

and measures. There was only one

man who knew the English weights

and measures; be studied them for

thirty years and he just knew them

all when the poor fellow went mad

Long ago we simplified the currency system and in 1786 led the world in

adopting the decimal units of money

in place of an absurd coinage of

pounds, shillings, pence and farthings.

But for some strange reason, we have

lagged behind the rest of the world

in extending the decimal system,

which is so simple and easily com-

puted, to other factors in our daily

life. When James Watt, the Scotch

inventor, announced the plan in 1783

upon which the metric system is

based, Washington, Jefferson, Robert

Morris and Gouverneur Morris immedi-

ately indorsed its adoption for our

weights, measures and coinage. Wash-

ington, in his first message to con-

gress, urged its adoption, but its ap-

plication to our coinage only was

made. In 1866, through the efforts of

Charles Sumner of Massachusetts the

metric system was made the legal

But the average American, seeming-

ly wedded to an outgrown tradition,

has preferred to go on using the old

cumbersome system. In the mean-

time more than 100 countries of the

world have adopted the metric sys-

tem and are enjoying a great advan-

tage in commerce, education and com-

mon world understanding thereby.

Only in Great Britain and America

are there human beings who are out

of step, commercially and economically, with more than 1,000,000,000 of

the people of the world who are trading on the metric basis. That we are

conscious of this handicap is shown

by the agitation by various organizations and individuals which has been

under way for some time for general adoption of the metric system. The

states of Illinois, California, North

Dakota, Tennessee and Utah, with a

combined population of 16,000,000,

through their state legislatures, have

memorialized congress to adopt metric

standards. The General Federation of

Women's Clubs, which has a member-

ship of 3,000,000, at its national con-

vention at Grand Rapids, Mich., last

year, passed a resolution calling upon

congress to enact metric legislation as

soon as possible. More than 100,000

petitions, urging the same legislation.

are pending before congress and some

time ago Congressman Fred Britten

of Illinois announced that he expected

to introduce in this session of con-

gress a liberal metric standards bill

and press its passage.

system in the United States,

C. C. Thu, or of the American Near East Relief at Athens, Greece, reports to the American Tree association, of Washington, 60,000 trees were planted in one day on the slopes of Hymettus. School children and orphans made the pligrimage following the preparations week in advance by the army. In the forestry primer published by the association. Here is a lesson for pebbles formed man's most effective asm, with three times three.

Americans. The association has tree ! planting instruction ready and it welcomes all tree planters to membership in the tree planting army.

Slingshot Days

The country boy who uses a slingshot to knock some unwary sparrow off a limb has little thought that he is practicing one of mankind's earliest arts. Not alone is the story of David his work Director Thurber is using an instance. There were long centuries of the Stone age when slung

weapon-his only weapon, it is probable-in the chase of that considerable fraction of his animal food which had to be captured awing.

Toast With Honors

The reference to drinking a toast "with all the honors three" is to the cheers with which a toast is greeted. Some toasts are drunk standing, such as a loast to one's country, and are often received with hurrahs three in number, or, in case of great enthusi-

Nightmare

Senator Butler said at a luncheon

in Washington: "What ails our professors? Today they weep and wail over Europe's hatred of us on account of the debt settlements. Yesterday they were moaning and groaning about our imperialism and the ruin it is bound to bring on us from South America, Mexico and the Philippines.

"What have the professors been eating to give them such horrible, such

impossible nightmares? "When I read the professors' jeremiads I think of a little boy who awoke roaring with terror the other

muvver,' he sobbed. 'I " "Oh. dreamed I was a stick of candy and

eated myself up! Royal Gift to City

A royal villa containing one of the finest collections of porcelain, china. glass, crystals, ceramics and enamels in the world has been presented to the city of Naples by the widow of Count di Marsi, and has been publicly opened as a museum by the king of Italy. The museum is the Villa Floridiana, where once lived Ferdinand IV. king of the Two Sicilies. The collection fills 21 rooms, and consists of 10. 000 pieces. Among the prized exhibits are several Sevres cups used by Marie Antoinette of France. The collection includes rare specimens of wares from famous potteries and glass works throughout Europe and Asia.

Cannery Waste Utilized

Tomato cannery waste, formerly discarded, has been discovered to be worth 6 cents a gallon in Italy, where laundries now utilize it to remove stains from linen, particularly collars. The clothes are soaked in vats of the diluted cannery by-product for an hour, by which time the stains are so thoroughly loosened that they can be washed out with little soap and practically no rubbing .- Popular Mechanics Magazine.

Expectation of Life

Modern science has destroyed the tradition of "a short life and a merry one," writes Dr. Donald B. Armstrong in the North American Review. The life of the average modern is longer and merrier than that of a century ago. The average expectancy of life at birth has been increased from twenty-eight years in 1789 to fortyeight at the present time.

What a baby doesn't put into its mouth it puts in its nose,

Guard Against "Flu" With Musterole

Influenza, Grippe and Paeumonia usually start with a cold. The moment you get those warning aches rub on

good old Musterole. Musterole relieves the congestion and stimulates circulation. It has all the good qualities of the old-fashioned mustard plaster without the blister.

First you feel a warm tingle as the

healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief. Have Musterole handy for emergency use. It may prevent serious

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

Better than a mustard plaster

In one minute pain from corns is ended. Dr. Scholl's Zino-pads do this eafely

by removing the cause-pressing and rubbing of shoes. They are thin, medicated, antiseptic, healing. At all drug and shoe stores. Cost but a trifle.

Dr Scholl's Zino-pads
Put one on—the pain is gone!
