Which Will You Save?

YOU can save pennies or save chicks. Poultry yard facts show that ordinary untested rations and mixtures such as hard boiled eggs and oatmeal save pennies but not chicks. Usually 50% of them die. Poultrymen who are making money invest one penny more per chick and save 90 to 100% of their chicks. They feed Purina Chick Starters, the buttermilk starting ration containing Cod Liver Oil. We'll be glad to tell you of a feeding plan that's as simple as A B C. It saves chicks and brings them through to early maturity.
