

SICK WOMAN SOON RECOVERS

By Taking Lydia E. Pinkham's Vegetable Compound

"A neighbor advised me to try Lydia E. Pinkham's Vegetable Compound, which she said had helped her so much. So I bought a few bottles and tried it out. It sure helped me wonderfully. I felt much better. My work was no longer a dread to me. If I hear of any one who is troubled the way I was, I will gladly recommend the Vegetable Compound to them and I will answer any letters in regard to the same."

—Mrs. BERTHA MEACHAM, 1134 N. Penn. Ave., Lansing, Mich.

"I had been sickly ever since I was fifteen years old. After taking Lydia E. Pinkham's Vegetable Compound I got so I could do all my housework and I am in good health."—Mrs. MARIK K. WILLIAMS, Ketchikan, Alaska.

From Michigan to Alaska, from Maine to Oregon and from Connecticut to California letters are continually being written by grateful women recommending Lydia E. Pinkham's Vegetable Compound.

The Compound is made from roots and herbs and for more than fifty years has been helping to restore run-down, over-worked women to health.

TRAVEL AROUND CONTINENT OF AUSTRALIA

The photograph shows the motor car in which Pastor Deen and his wife traveled around the entire continent of Australia, a distance of 11,310 miles, in four and one-half months. In some of the wild parts of the country they were attacked by savages, but succeeded in finishing the journey safely.

BULLETIN GIVES HINTS ON TIRES

Should Be of Help in the Constant Effort to Extend Their Life.

The mechanical first-aid department of the Chicago Motor club has issued a bulletin on tire care which should be of help in the constant effort being made to extend the life of tires. Some of the causes of damage are given as:

Motorists should examine their automobile rims to see that they are not the cause of loss of service from tires. Their true-ness should be verified so that the tire may run without "wobbling." Bent flanges should be straightened and rust should be removed, as these conditions tend to chafe the side of the tire.

Side Wall Wear.
Brushing the curb when turning a corner or parking, or driving carelessly over frozen, rutty roads, tends to wear the rubber off the side wall, leaving the fabric foundation exposed. Water and dirt can enter the fabric and the tire soon is destroyed. Side wall injuries should be repaired, without delay, by an experienced vulcanizer.

Tubes are frequently damaged by pinching when they are being applied. A little care will avert this danger. The flap should be smoothly and carefully applied in straight-side tires. A wrinkle will cut the tube and cause a slow leak. Both the lock nut on the valve stem and the valve cap should be screwed down tightly.

Stone Bruises.
Probably breaks or cracks in the fabric body—commonly called "stone bruises"—more than any other cause, make it necessary to scrap tires before they have given full service. A "stone bruise" usually is the result of the fabric inside of the tire being forced sharply down against the steel rim. Most accidents of this type can be traced to insufficient inflation of tires, or to striking some projection in the road while traveling at high speed. Striking the curb when turning a corner or turning around in the street also is responsible for many "stone bruises." The tire can usually be saved if such injuries are repaired promptly by a good vulcanizer.

Motorists Pay Much for Gas Tax in Six Months

A total of \$101,250,341 was collected in gasoline taxes from the motorists of the United States during the first six months of 1927, according to figures compiled by the American Motorists' association in conjunction with the United States bureau of public roads.

This was the tax collected on the sale of 3,971,423,311 gallons of gasoline, or an average tax of \$4.90 per motorist, for the six months' period. Based on a per motorist basis, the figures show that each automobile in the country, the first six months, used an average of 180 gallons of gasoline, the average gasoline tax for the entire country being 2.55 cents per gallon.

Motorists Paying Little for Our Improved Roads

Automobile registration fees and gas taxes total less than 5 per cent of the annual motoring bill, according to C. M. Babcock, president of the American Road Builders' association. Mr. Babcock estimates that of the total road bill, including state aid, county and town levies, about 10 per cent is spent for motor transport. He points out that taxes are a small part of the cost of operating a car and motorists may cut their expense by driving less or using a smaller car, or by putting more money into better roads.

Hogged the Roads

Experience is not everything in safety on the highways. An observer recently was riding with a motorist who has been driving since 1907 and who spent a number of years instructing. This is what he found:

Sixty-eight miles an hour is not too much speed for him.

He never lets anything pass him on the highways.

He always starts in second gear.

Floating Siphon Insures Tourist Clean Gasoline

Many tourists, particularly those of the motor-camper class, use a rubber-tube siphon to fill the tanks of their camp stoves or gasoline lanterns. Clean gasoline is essential to the proper operation of any gasoline-heating unit. Dirty gasoline containing water is often caused by the end of the

Cork on End of Siphon Prevents Getting Sediment and Water Out of Auto Gas Tank.

siphon tube extending down to the very bottom of the gas tank of the car, which permits it to suck up some of the sediment and water accumulated there. This trouble is avoided by attaching a large cork, which can just be slipped through the filler hole of the tank, to the siphon tube, about an inch or so from the end. The tourist is then always assured of getting clean gasoline. —Popular Mechanics Magazine.

Vehicles Registered in 1927 Totaled 20,991,333

A total of 20,991,333 motor vehicles were registered in the United States in the first six months of 1927, according to data collected by the bureau of public roads of the United States Department of Agriculture from the various state registration agencies. This represents an increase of 1,374,578 or 7 per cent over the registration during the same period of 1926.

The states showing the largest percentage increases are Tennessee, South Carolina, North Carolina, Illinois, West Virginia, New Jersey and Massachusetts. It is worth noting that 1926 statistics showed all of these states to be above the average of 5.4 persons per motor vehicle for the entire United States.

Maryland Chooses Tag Colors for Two Years

Maryland auto tags will be white with blue numerals for 1928, according to Automobile Commissioner Baughman. In 1929 they will be green with white numerals.

An advance decision was made concerning the tags, according to Mr. Baughman, to prevent other nearby states from selecting similar colors, as has happened in the past.

Warning that Maryland has selected the colors is contained in Mr. Baughman's New Year greeting to the commissioners of motor vehicles in other Eastern states.

AUTOMOBILE NOTES

Switzerland has one automobile for every seventy-five persons.

Driving with a dirty windshield is similar to that of driving on a foggy night.

Cleaning greasy matter from brake linings can best be done by removing the band or shoe and brushing it in gasoline.

Minus one arm and both legs, Andy Crumshaw of Alliance, Ohio, has a racing car built especially so he can control it, and has won recognition as a racing driver.

EASY LESSONS IN AUCTION BRIDGE

By PAUL H. SEYMOUA
Author of "Highlights on Auction Bridge"
Copyright by Hoyle, Jr.

Article Twenty-Four. Declarer's Play of No Trump (Continued.)

THE following deal illustrates ducking:

♠—8, 7, 6
♥—K, 8, 7, 6, 5
♦—9, 5
♣—6, 3, 2

♠—A, Q, 9, 5, 3
♥—J, 8, 2
♦—10, 6
♣—10, 4

♠—K, J, 4
♥—A, 4, 8
♦—K, Q, 7, 2
♣—A, K, 9

South deals and bids one no trump, as he has a particularly good hand with all four suits protected and four and a half quick tricks. All pass and south becomes the declarer.

West leads his fourth best diamond, the four. Dummy is spread on the table and declarer looks over the two hands. The prospect is not very good. He can see two tricks in each of the three suits, hearts, diamonds and clubs; but his spades are very doubtful. His only hope of game is in the heart suit and the only way to establish and make dummy's small hearts is by the play called "ducking" which he decides to try.

The deal is played as follows:

1	—	D4	D5	D10	DK
2	—	H10	H5	H2	HA
3	—	HQ	H6	H9	H3
4	—	DA	D9	D6	D2
5	—	DJ	C2	C4	DQ
6	—	S2	HK	HJ	H4
7	—	C5	H8	S3	D7
8	—	S10	H7	♣C9	C9
9	—	C7	C6	CJ	CA
10	—	C8	C3	S5	CK
11	—	D3	S4	SA	SK
12	—	D8	S7	SQ	S4
13	—	CQ	S8	S9	SJ

Declarer makes three odd tricks.

Declarer ducks the third trick by playing low in dummy in order to save his King to take the third round of hearts and thus make dummy's remaining cards in the suit. At trick 9 he considers the advisability of leading a spade but decides against it because West may hold the Ace; in which case game would be lost because of West's two good diamonds. At trick 11 declarer knew that West did not have any spades because he could place him with the Queen of clubs and two diamonds; therefore by leading the King of Spades declarer with quite sure to get one more trick.

The following deal illustrates the use of the informative double in the bidding; and the choice of opening lead and the use of the echo in the play:

♠—A, 10, 9, 3
♥—J, 2
♦—A, K, 8
♣—Q, J, 10, 5

♠—8, 4
♥—K, Q, 10, 9, 5, 5
♦—Q, 7
♣—A, K, 8

♠—Q, 6, 3, 2
♥—7, 6, 4, 2
♦—10, 6, 4, 2
♣—7, 4

♠—K, J, 7, 5
♥—A
♦—J, 9, 7, 5
♣—9, 6, 5, 2

West deals and bids one heart. North has the other three suits all protected and three and a half quick tricks; so he doubles. East passes and South bids two Spades. West bids three hearts and North three spades, which ends the bidding.

West has an Ace King combination which is the most desirable for an opening lead, and he therefore leads, the King of clubs in preference to his long heart suit. Dummy is spread and declarer makes a survey. He must finesse his trumps and can do so either way. He has two diamond tricks, and one heart and possibly two in clubs but cannot see enough to go game. He plays the hand as follows:

1	—	W	N	E	S
2	—	CK	C5	C7	C2
3	—	CA	C10	C4	C3
4	—	CA	CJ	S8	C8
5	—	H5	H3	H7	HA
6	—	S4	SA	S8	S5
7	—	S8	S3	SQ	SK
8	—	D8	DA	D2	D6
9	—	DQ	DK	D4	D7
10	—	H8	D8	D6	D9
11	—	H9	HJ	D14	DJ
12	—	H10	CO	H2	C9
13	—	HQ	S10	H4	S7
14	—	HK	S9	H6	SJ

Declarer wins four odd tricks.

East used the echo on the first two tricks, and therefore West led clubs a third time although the Queen was in dummy. This made one extra trick for East and West. At trick 4 East properly led his partner's suit as this was leading up to the weakness in dummy. The fall of the Queen of diamonds on trick 8 enabled declarer to finesse his nine spot at trick 9 and so obtain four tricks in diamonds and four odd on the deal.

Bulgar's Folk Song

The most striking part of the Bulgarian folk song is . . . the tune, wild and mournful, in a scale neither pure minor nor major, but partaking of both. The time is strange; 5-4 and 7-4 are common, and irregular measures much more frequent than in western Europe. As is often the way among peasant singers, the songs are pitched high, and sometimes a refrain is broken by shrill cries; there is no yodeling. The melodies are short and the repetitions many. Of course, these generalizations do not take us far; simple minor and major tunes and jog trot rhythms may also be heard, but are not frequent or characteristic.

—Elizabeth Marriage Mineoil in the Cornhill Magazine, England.
