FARM CALENDAR.

Timely Reminders from the Pennsylvania State College.

BORER MOTHS FLY AT NIGHT.—In answer to the question, "When do corn borer moths fly?" State College entomologists say, "They fly mostly in the dusk of the evening or at night." The moths are not attracted to lights in sufficient numbers to make them effective for trap purposes. Many kinds and colors of lights have been tested but none has proved effective.

GET HINTS BY RADIO.—Valuable farm and garden items are broadcast by specialists every Tuesday night, 6:30 to 7:30, from the Pennsylvania State College radio station, WPS-C.

ALFALFA IS BEST HOG PASTURE.—For hogs, alfalfa is the best pasture obtainable, furnishing a maximum of ideal forage throughout the season, even in dry weather. As many as 20 shoats can be carried on an acre. Try to plant some alfalfa this spring.

START HOTBEDS NOW.—Now is the time to start hotbeds for early vegetables if not already started. They should be placed in a sheltered corner where they will receive plenty of sunlight.

PLANT TREES AND SHRUBS.—March is the planting month for hardy trees, shrubs, vines, and herbaceous perennials. This work can be done best now before the other spring work on the farm increases.

REPAIR, OIL AND ADJUST HARNESS.—Go over all the harnesses, make repairs and grease them thoroughly. See that the harness fits the horse which is to wear it. An ill-fitting set of harness lowers the efficiency of the animal.
