The Wonderful Genius of Man.

This is indeed the age of genius most sublime. Today, while sitting under a shade tree in a park, loud sounds emanated from the heavens above, most wonderful.

It is recorded in ancient writ that betime the "Gods spake to men." We wonder? The sounds heard today were from a "mere man" sailing about in the heavens a mile or more above earth, announcing the news that Philadelphia had become a "n-airport" second to none.

The oracle was in an airplane sending messages to mere mortals from on high. The messenger's voice resounded as clear as if but a few feet distant. It was indeed startling, thrilling, wonderful! Truly, mere man has surpassed the "gods" in these latter times in many ways, thus more clearly defining his powers and genius that excel in wonder all else ever before revealed to mortals.

O genius, thou art indeed sublime. —Dr. Alfred Beirly, Philadelphia, Pa., July 30, 1928.

\$678.60 EXTRA PROFIT —On Last Season's Wheat Crop

Facts for Wheat Growers

From Mrs. Thos. Bosley & Sons, Butler, Baltimore Co., Md. "We have been using 'AA QUALITY' Fertilizer for several years and by comparison find that we get between 25% and 35% better wheat crops than neighbors who use other makes of fertilizer. The bags are good and strong and the mechanical condition perfect. The treatment which I receive from your Company is all that I can ask."

From Mr. J. L. Reitz, Lewisburg, Union Co., Pa. "During the course of a year I use about 100 tons of fertilizer and it is very important that I get the best, not only from a producing standpoint but something that is mechanically perfect. It is for this reason that I buy 'AA QUALITY' Fertilizers." August 13, 1927.

CONSIDER these facts about the winter wheat grown last season by Mrs. Thos. Bosley & Sons, of Butler, Baltimore Co., Md. These successful growers obtained an average yield of 37 bushels an acre from their 58-acre crop, most of it grown on cornstalk ground. By comparing their yields with those of neighbors who used other makes of fertilizer, Mrs. Bosley & Sons say in a recent letter, "We get between 25% and 35% better crops than neighbors who use other makes of fertilizer." With wheat at \$1.30 per bushel, this increase in yield meant a total gain of \$678.60 on their crop. Read their letter in the next column.

Extra profits like this make "AA QUALITY" Fertilizers by all odds the cheapest goods you can buy. Don't be misled into buying cheap fertilizers—don't buy fertilizer on the basis of chemical analysis alone.

You get bigger yields, better quality—and more profit—with "AA QUALITY" Fertilizers because these goods are made with painstaking care from the choicest plant-food materials, according to formulas which meet the exact needs of your soil. Every bag comes to you in superb mechanical condition—so fine, dry, and uniformly mixed that you get easy, even distribution. Each rootlet obtains a complete supply of the carefully selected plant foods necessary to carry your crop from seeding to maturity. This means better stouling, fuller heads, more bushels to the acre, more pounds to the bushel—and bigger profits.

You owe it to yourself to try "AA QUALITY" Fertilizers. See the "AA QUALITY" dealer today.
