FARM CALENDAR.

Timely Reminders from the Pennsylvania State College.

GOOD BREEDING PAYS—How about the sire at the head of your herd? Is he from a line of breeding better than your present herd? If not, you better stop using him right now and plan to buy or get the use of a bull that will put your herd ahead. How about joining a bull association or uniting with your neighbors in getting one started?

PLANT IN LONG ROWS—Do away this year with the old-fashioned garden of beds and paths. State College vegetable specialists urge. Throw the whole garden into one bed. Plant and sow in long rows and use a modern wheelhoe for cultivating. This method insures greater returns with less work.

GROW MORE ALFALFA—One way for farmers to avoid paying high prices for clover seed to get legumes is to apply more lime and sow alfalfa where it can be grown. See specialists at the Pennsylvania State College.

PLAN FOR EARLY EGGS—Early hatching of chickens this spring and proper handling of the pullets will bring them into laying condition next fall during the months of high-priced eggs.

SELL DRESSED BEEF—During the winter months when the farm chores are not pressing, some extra profit may be made on fat heaves if sold dressed rather than on foot. It is not advisable to attempt to do this, however unless there are suitable slaughtering facilities at hand and an experienced man is available for supervising the work.

IMPROVE FOREST TREES—Forest improvement cutting betters conditions for growth, increases the proportion of good trees, and insures better individual trees.

School nurse says all girls should know this

TALKING to a roomful of high school girls on personal hygiene, an experienced district nurse said: "One of the basic rules of health for girls is to keep the system functioning naturally at all times. Normal exercise and diet habits should be encouraged. But when necessary there's no harm in taking nujol, since it works mechanically and can't disturb the normal functions of any organ of the body. Particularly with girls, there are times when nujol should always be taken. Take a spoonful every night for a few days. It's a thoroughly safe and harmless method. It won't cause distress or gas pains or griping." Nujol is different from any other substance. It contains no drugs or medicine. It can be taken safely no matter how you are feeling because it is so pure and harmless, and works so easily. Every woman should keep a bottle on hand. Every druggist has this remarkable substance. Get the genuine.
