FARM COMMISSION APPROVES SHOW BUILDING

Structure 700 Feet Square Providing Room for Show Purposes and Coliseum--To Be Located on 45-Acre Tract at State Capital.

At a special meeting of the State Farm Products Show Commission held in the office of Secretary of Agriculture C. G. Jordan, the proposed building to house adequately the State Farm Show, was unanimously approved. The Commission announced a few days ago.

The plans call for a building 700 feet square with approximately 430,000 square feet of space for commercial and agricultural exhibits, a coliseum to seat 3,000 people, and sufficient meeting rooms to accommodate the annual conventions of farmers' organizations.

The location of the building on a 45-acre tract of land at Cameron and Maclay streets, easily accessible to the business district and hotels of Harrisburg, has also been approved by the Commission.

In formulating plans for a show building, the Commission is keeping in mind the trend of agriculture in Pennsylvania so that departments which are

likely to expand in the future can be housed adequately. Ample space will be provided for livestock in order that this important branch of agriculture can be displayed as has never been possible before.

The Commission has also unanimously endorsed the policy of encouraging the use of the proposed building for industrial shows, State, district and national conventions, indoor athletic events, concerts and various State purposes. A year-round program for making the greatest possible use of the structure is being given careful consideration by the Commission and every inducement to use the building will be offered to industrial and educational as well as agricultural bodies.
