FARM CALENDAR.

Timely Reminders from The Pennsylvania State College.

KEEP ONLY GOOD COWS—Weed out the poor cows. The cost of producing a hundred pounds of milk often can be reduced extensively by selling two or three of the lowest producers. Make changes gradually and be sure that rations are balanced as nearly as possible. These practice pay.

GROW HEALTHY CHICKS—Freedom from disease is essential to growing a large percentage of the chicks hatched. Choose eggs from disease-free parents, or if you buy baby chicks get them from flocks known to be free from bacillary white diarrhea.

PREPARE FOR SAP FLOW—Maple sugar makers are preparing now for the first run. They know that the first of the season's sap is sweetest, clearest, and of the highest quality. Buckets and equipment are being cleaned, wood for boiling collected, and everything put in readiness. To miss one good run often means the difference between profit and loss for the season.

LEARN TO FIGHT WEEDS—Little

weeds are tender, but not tender-hearted. They become hardened criminals. The Pennsylvania State College has free leaflets on buckhorn, Canada thistle, chickory, galinsoga, horsetail, horse nettle, range hawkweed, poison ivy, quack grass, and wild onion or garlic. Send for the ones you want.

PICK GOOD APPLES—Carefully choose varieties of apple trees to be planted this spring. Many of the kinds once considered leaders are now being displaced by higher quality and better selling varieties.

IS POPULAR VEGETABLE—Asparagus is no longer rated as a luxury, but is considered a staple article of diet. For a family of five, plant 50 to 100 roots and have a delicious green available every day for the first two months of the spring garden.
