Of this union was born one son, Harry, who died when four years old. They went to Kansas and located at Central City on a farm. Eight years ago his wife passed away and he then came to Pennsylvania and visited his brothers and sisters. After a few months' visit he returned to Kansas, and afterwards came back to Pennsylvania, and again, he decided to go back to Kansas, but his brother and family went with him and gave him a comfortable home on the farm, where he passed away. NO WORD FROM McNITT.

The scores of rumors of the trading and movements of A. J. McNitt, a Bellefonte business man, are unfounded. He was not traced by mileage coupons to Washington. The only certain thing is that he left Bellefonte on February 23rd, stating he was going to Washington, D. C., and then to Miami, Florida. No clue of any kind has been discovered of his movements after entering the train east on the afternoon of the day named above.

Information Wanted.

A lot of farmers and other taxpayers must have encouraged Senator H. B. Scott to favor the four-cent gas tax bill, for he is advocating it day in and day out. Surely Senator Scott would not want to add a tax of a cent a gallon to every bit of gas bought for the auto had he not been encouraged by those who expect to pay it. This view is taken because Senator Scott, when he speaks, always says he is the servant of his constituents and that he will do anything for them in his power that they ask. We would all like to know the names of the taxpayers in Centre county who begged Mr. Scott to work and vote for the four-cent gas tax. If these send their names to the Reporter they will be printed in type large enough for the near-blind to read.

Grange Park Improved.

Among the improvements contemplated on Grange Park this spring and summer is the planting of a large number of shade, nut and ornamental trees. Among the varieties of trees selected are elm, maple, European tulip, mulberry, sycamore, black walnut, English walnut and hickory.

FLOYD WALKER AWARDED STAR MAIL ROUTE

Floyd Walker, who a few days ago moved to Centre Hall from the Potter farm west of town, was awarded the contract to carry the mail between Bellefonte and Millheim, beginning July 1st. The contract price is said to be \$1400. The schedule is the same as in force at this time, the carrier being James Marshall, of Bellefonte, who was also a bidder to continue the service.

The service performed by John Weaver between State College, Lemont and Bellefonte, has been secured by Henry Myer, who also was awarded the contract for service between Tyrone and Bellefonte, via State College, mention of which was previously made in these columns. He will succeed Mr. Weaver, July 1st. The contract price is said to be \$2650, or thereabouts.

Hon. John L. Holmes voted for the four-cent gas tax. How do you like it?

Senator H. B. Scott is given credit with having introduced in the legislature bills providing for more than one hundred miles of road in Clearfield county to be taken over by the State. That is fine, but how about Centre county? There is no move on that is known to local Scott-Holmes benches to take over either the Old Fort or Brush Valley roads, the latter leading west from here.

Mental pictures every car buyer should have

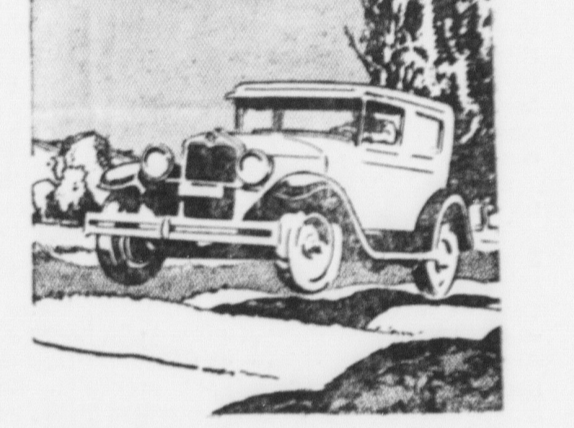

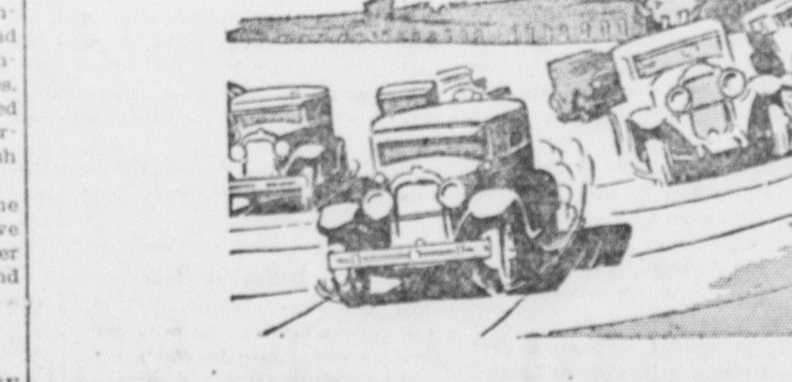

SOME DAY you will consider buying a new car.

Keep in mind these pictures made from photographs of scenes at General Motors' 1268-acre Proving Ground. A car wallowing in a sunken road with water over the hubs... a car bucking a long stretch of cruel bumps and potholes... a car straining to reach the top of a heart-breaking hill... a car doing twists and turns and other acrobatics that few cars are ever called upon to do.

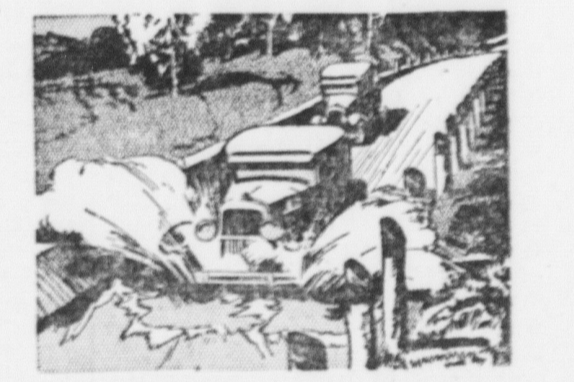

Such are the tests given advance models of a General Motors car at the Proving Ground. The tests involve speed, power, endurance, braking, riding comfort, handling ease; fuel, oil and tire economy, body strength—every phase of car construction and performance. When every test has been met, the factory goes ahead and builds your car like these proved models.

Keep these pictures in your mind. They will come in handy next time you are buying a car.

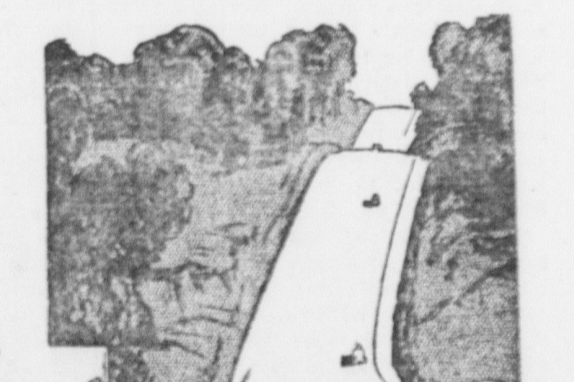

On this four-mile test track the engineers can run a car night and day, at any speed, to learn just how it stands the pace.

Rough going on a Proving Ground road, made had to test various parts of General Motors cars under hardest possible conditions.

A scientific "bath tub"—not to wash cars, but to show the Proving Ground engineers exactly what happens when a car is driven through water.

Very seldom are hills as steep as this. The average grade of highway hills is seven per cent. This hill is 25 per cent and a car must be good to make it.
