Service Station Burned.

Boalsburg had quite an excitement about 1:50 o'clock Sunday morning when a log house on West Main street, owned by William Meyer and tenanted by Stricker and Meyer as a service station, was discovered to be on fire. Miss Ellen Dale, whose home is almost opposite the building, was attracted to the window by the sound of breaking glass and found the interior a mass of flames. Miss Dale immediately telephoned the exchange, while her sister succeeded in arousing nearby neighbors, who fought the flames with small hoses until the operator aroused the fire company, and later sent a call for the State College fire company. It was plainly evident that the burning building could not be saved as the fire had gained headway before it was discovered, but sparks were falling on buildings a square distant, the greatest danger being to the A. E. Gingrich shop and a large quantity of fine lumber owned by Mr. Gingrich and piled on the adjoining lot. A timely shower no doubt saved the town from a disastrous fire.

The building is a complete ruin and

all the contents, including a Chevrolet sedan owned by Harry Crummy were burned. The owner and tenants carried some insurance, as did Crummy. The origin of the fire is unknown.

Want Bus Line Right.

The Pennsylvania General Transit company, bus subsidiary of the Pennsylvania Railroad, filed an application with the Public Service commission for a permit to run a bus service between Bellefonte and Philipsburg.

FARM CALENDAR.

Timely Reminders from The Pennsylvania State College.

CONTROL ROSY APHIS—If weather conditions and the extreme variations in bud development, have prevented the application of nicotine sulphate spray for the control of rosy aphis, growers should apply the spray as soon as possible so that the whole orchard is covered at least once.

PROVIDE PLENTY OF HOPPERS—Stunted chicks are likely to be the result of an insufficient amount of hopper space. It is a wise plan to watch the chicks and supply more hoppers whenever the chicks are crowded to obtain feed.

PRACTICE SAFETY FIRST—When blasting stumps be careful of hanging wires. Instead of risking life and limb by immediate investigation, look at the charge the next day. The electric method of firing is the safest and surest.

SAVE GIRDLED TREES—Bridge-grafting the injured places on trees girdled by mice will prevent loss of the trees. Use of plenty scions provide greater food-carrying capacity, say State College fruit specialists.

PLANT FOR EARLY HARVEST—Enthusiastic home gardeners at this time of the year are looking forward with a great deal of interest to the date when it will be possible to harvest vegetables. A gardener's skill is reflected largely in the ability to mature vegetables early in the season.

Real NON-SKID PERFORMANCE SLOW, EVEN TREAD WEAR

That's what the Goodyear All-Weather Tread Balloon Tire gives.

Real Non-Skid Performance--because the deep-cut, sharp-edged blocks in the tread's centre seize, grip and hang-on.

Slow, Even Tread Wear--because these sharp-edged blocks are placed in a semi-flat design. They not only grip the road, but retain their usefulness longer than any non-skid tread heretofore offered.

Come in and see it. We'll let the tire do all the talking. It's backed by our standard Goodyear service.

MORE PEOPLE BUY GOODYEAR TIRES THAN ANY OTHER KIND.
