HUMAN BODY NOISY, NEW DEVICE REVEALS

Every muscular movement of the human body is accompanied by scraping, rattling sounds, but, fortunately, the ear is not sufficiently sensitive to hear them, according to Sergius P. Grace, assistant vice-president of the Bell Telephone Laboratories—the experimental and research organization of the Bell System. During a recent demonstration of telephone equipment perfected in the laboratories, Mr. Grace amazed members of the Engineers' Club of Philadelphia by amplifying the "muscle scraping" sounds until they attained almost deafening volume.

Attaching to a large loud speaker an electro-magnetic pick-up device developed by the laboratories, Mr. Grace placed the mechanism against his chest and worked his jaw muscles, producing through the loud speaker a crescendo of rattling noises not unlike the crash and roar of thunder.

BASEBALL.

Results of games played by Centre Hall during the past week:

Wednesday, at Centre Hall—Centre Hall, 4; Rebersburg, 4.

Saturday, at Milesburg—Phillipsburg, 7; Centre Hall, 5.

Tuesday, at Rebersburg—Centre Hall, 6; Rebersburg, 3.

Rallies against "Pep" Ziegler gave the locals a 6 to 3 victory over Rebersburg on Tuesday evening. Gross' timely two-base hit with two on the paths gave Centre Hall the victory. Goodhart had three hits to his credit. Crawford gave his opponents five hits but was very effective in pinches. He pulled himself out of a hole with two o bases by starting a very unusual double play. The whole Centre Hall team worked like a machine and let's hope they keep it going that way.
