EXPERIMENTING ON  
FEEDING DEER

A Herd of Twelve Fawns Collected at  
Penn State for Purpose.

The general belief that the finding,  
last fall of so many dead deer in var-  
ious sections of Pennsylvania, was  
due either to lack of proper food in  
sufficient quantities or to the deer eat-  
ing food not furnishing sufficient nour-  
ishment, a herd of twelve fawns are  
being collected at Pennsylvania State  
College for feeding experiments.

On Monday noon Jess Hasser, a  
State trapper, of Reedsville, passed  
through here with fawns Nos. 7 and  
8 of the herd. They were captured  
when quite young by Miles Rager, a  
Union county game warden, having  
been abandoned for some reason, and  
were reared by him. They were in fine  
condition and were viewed by many  
while the truck carrying them was  
parked at the Mitterling restaurant,  
while the trapper and wife took lunch.  
Many interested in wild life will re-  
call that while the State Game Com-  
mission was floundering about in  
search for a cause of the death of  
deer, a P. S. C. professor was called in  
to conference at a meeting held in  
Lewisburg. The offer was made to aid  
the commission, and it was accepted.  
The experiment in feeding fawns about  
to begin is the result.

Fatal Auto Accident.

When their car left the road about  
a mile west of Martha, at 3:15 o'clock  
Friday afternoon, three Pittsburgh res-  
idents were injured, one fatally, and  
their car, a large sedan, demolished as  
it struck a telephone pole. One of the  
occupants of the machine, Miss Mirna  
Anger, aged 35, died at 8 o'clock Satur-  
day morning at the Centre County  
hospital, death being attributed to a  
fracture of the skull. She was render-  
ed unconscious in the crash, and re-  
mained that way until the end.  
The other occupants of the car were  
the driver, George C. Shade and Miss  
Helen Steinet. Both received injuries  
about the head and face, and Miss  
Steinet suffered a broken nose. All  
of the injured persons were taken to  
the hospital in the ambulance, and  
Miss Steinet and Mr. Shade were dis-  
charged early Saturday morning.  
The accident was attributed to a de-  
fective steering gear.

For Speed  
Power and  
Pick-up...  
a six without a  
rival at its price

Without a single exception, the Pontiac  
Big Six is the fastest, most powerful six of  
its price available today. Its sturdy, 200  
cubic inch, L-head engine develops 60  
horsepower at moderate engine speed.  
Its speed and acceleration are the fastest to be found  
in any low-priced six, according to the "fifth wheel"  
—the most accurate speed measuring device known to  
automotive engineers. Unquestionably, today's  
Pontiac Big Six is the performance leader of its price  
field—and the style and value leader as well.

PONTIAC BIG SIX  
Product of General Motors

If you are interested in a car costing any-  
where near Pontiac's price, your own inter-  
ests demand that you see and drive today's  
Pontiac Big Six. And when you come in,  
bring your present car for our appraisal.  
Its value will probably cover the down  
payment, leaving only a few dollars per  
month to pay. And, as you pay, you will  
be enjoying the finest car of its price the  
market affords.

Consider the delivered price as well as the list (f. o. b.)
