Pennsylvania Caverns.

R. W. Stone, assistant State Geologist, in newspaper article on Pennsylvania caverns, makes these statements:

The question as to which is the largest may be answered by saying that the trip through the dry and wet cave at Alexander Caverns (near Reedsville, Mifflin county) is believed to be the longest underground trip regularly offered to visitors.

Anyone who has never been in a cave will find much interest in any of the Pennsylvania caverns.

FARM CALENDAR

Timely Reminders from The Pennsylvania State College.

TAKE CARE OF SPRAYERS—Growers are urged by entomologists and plant pathologists of State College to take good care of spraying equipment.

PROTECT ORCHARD TREES—Much of the injury to fruit trees from rabbits and mice can be prevented by protecting the trees before the snow comes.

SAVE SOIL FOR PLANTS—Leaf mold or other rich soil should be placed in a box and stored in the cellar before the ground freezes.

IMPROVE THE WOODLOT—This is just the time to lay plans for woodlot thinning work during the fall and winter.

USE BARREL FOR STORAGE—A large barrel, buried in a horizontal position in the side of a bank, makes a convenient place to store small amounts of root crops and cabbage.

KILL BORERS THIS FALL—Shredding all corn or stover not ensiled helps to control the European corn borer.
