FARM CALENDAR

Timely Reminders from The Pennsylvania State College.

HELP APPLES TO KEEP—Assist stored apples to breathe correctly by furnishing plenty of air. Proper ventilation will aid in keeping the fruit longer in storage. If the humidity is not right, the floors should be sprinkled.

PREPARE FOR SPRING LAMBS—Feeding one-half pound of whole oats and shelled corn to each ewe daily insure good breeding conditions and a better and more uniform lamb crop. The grains should be fed in equal proportions.

SOW GARDEN COVER CROP—Vegetable specialists at State College recommend seeding the garden to rye or some other cover crop. The growth will prevent erosion and the green material will improve the physical condition of the soil.

EXHIBIT CLEAN MILK—Cleanliness is important in preparing milk for exhibition just the same as in producing milk for sale. Clean cows, clean milkers and clean utensils and containers keep down the bacteria content and prevent spoiling.

SAVE GREEN TOMATOES—In sections where the frost has not killed the tomatoes, pick the green fruits and store them in a dark, cool place. They will keep for several weeks or months and may be ripened at any time by bringing them into the heat and light.

VENTILATE LAYING HOUSES—Pullets need ample ventilation in the laying houses after roosting in open brooder houses and in trees. Fall colds are the result of faulty ventilation.

FEED GOOD COWS MORE—One cow often eats the profits made by another. Feed each cow according to her production. A high producing cow needs much more grain than a low producer.

"Men and the Church" will be the theme for the Central Pennsylvania convention of Presbyterian men to be held at the Penn Harris hotel in Harrisburg, on Tuesday.
