LUTHERAN WOMEN CONTRIBUTE \$24,200 FOR MISSIONS.

The Sixth Annual convention of the Women's Missionary Society of the Susquehanna Synod of the United Lutheran Church, convened in St. John's Lutheran church, Lewistown, Wednesday and Thursday of last week, with an attendance of about 200, of whom 70 were official delegates.

The theme for the convention devotions was "Christ's Co-laborers." Mrs. Mitchell, of Lewistown, conducted the opening devotional service, speaking on "Christ's Call," using as her text, "Go Ye" and urging a personalization of this command of Christ.

The reports of the officers show that there are 2490 active workers in the organization, and about 400 honorary members. The treasurer's report shows that these societies have given during the past year more than \$23,000 to the general mission work of the Church, in the support of missions in India, Africa, Japan, China and South America, as well as a great many home missions. The total amount given for all purposes amounted to almost \$24,200.

The following officers were elected for the coming year: President, Mrs. R. M. McGiffin, of Lewisburg; vice-president, Mrs. Joseph E. Law, of Avila; recording secretary, Mrs. Anne L. Kopley, of Lewistown; treasurer, Miss Marian Dimm, of Thompsettown; and statistical secretary, Mrs. Mearl Pace, of Lewistown.

The convention accepted an invitation to meet next fall in Bloomsburg.

FARM CALENDAR

Timely Reminders from The Pennsylvania State College.

PROVIDE ROOM TO EAT—Making it easier for the hens to consume large quantities of mash adds in the production of eggs. At least 10 linear feet of double hopper space should be provided for 100 hens.

PROLONG VEGETABLE SEASON—Endive that has been tied for several weeks for bleaching should have protection from light frozes. Mulching with some kind of litter such as leaves, or removing the plants with roots attached and storing them under shelter will prolong the endive season. The hotbed or coldframe is a good shelter for the plants.

PROTECT COWS FROM RAIN—Keep the dairy cows in the barn on all cold, rainy days during the fall months. The additional milk obtained will pay for the extra feed and care.

SAVE SOIL FOR PLANTS—Boxes of leaf mold, rich soil, and sand may be placed in the basement for use next spring when planting seeds in flats and boxes.

TELLS HOW TO FEED BEES—Friction-top pails or glass fruit jars may be used to feed sugar syrup to bees. Punch holes in the covers, fill the containers with syrup, and invert them over the frames or the opening of the inner cover of the hive, say Penn State College apiarists.

CHOOSE APPLES FOR USE—Apples in good condition for eating are highly recommended as a food for health. When buying it is best to ask

for the varieties suitable for dessert, baking or pies, depending on the use for which the fruit is desired. Apples also are better at certain times of the year than others.

STORE GARDEN TOOLS—Clean all garden tools and grease or oil the metal parts before storing them. Repairs can be made during the winter so everything will be ready for spring.
