"IN THE SOUP"

An old expression which originated in the kitchen of an OLD TYPE BOARDING HOUSE.

The kitchen was composed of several cooks and helpers, who, with their favorite boarders participated in many midnight lunches, disposing of much food noticeable to the landlady. Whenever inquiry was made as to the whereabouts of this or that, it "was in the Soup." Gone, of course.

Were you to be visited by midnight prowlers or a fire, where would you be?

farm efficiency IS YOURS UP TO STANDARD?

FARMING is just like any other business—must be kept up to standard efficiency if any money's to be made. Progressive growers no longer trust to chance that some plague won't hit their field crops. You've got to take scientific steps to protect your income.

the improved
Niagara
Dri-Fog Dusters

Years of dusting experience have gone into the construction of this Dri-Fog Crop Duster. It is adapted to its job in every respect—designed to operate efficiently. FAST, THOROUGH coverage is accomplished with a big saving of time and material.

The Dri-Fog Duster is sturdily built, yet it is light enough not to be another "horsekiller". The construction is simple—easily adjusted and repaired. The improved dusting mechanism is designed to break up the dust into a uniform cloud of the desired intensity, equally divided among the nozzles. Every row, in this way, receives the same, correct amount of dust.

Niagara truck-crop dusts, having copper as a fungicidal base and calcium arsenate as a poison for external chewing pests, give quick and effective results with the Dri-Fog.
