

FARM CALENDAR

TIMELY REMINDERS FROM PENNSYLVANIA STATE COLLEGE SCHOOL OF AGRICULTURE

Feed Grain to Cows—
Feeding grain to cows on pasture is considered a profitable practice by progressive Kyestons dairymen. Guernsey and Jersey cows giving more than 25 pounds of milk daily should get one pound of grain for every 5 or 6 pounds of milk produced and other breeds of cows should receive one pound of grain for each 6 or 7 pounds of milk given.

Protect Farm Buildings—
To protect buildings properly all lightning rods should be well grounded. A wooden trough nailed over the down rods will prevent livestock or farm implements from running into them and loosening or breaking them.

Take Care of Chicks—
Crooked breast bones in chicks are likely to be caused by a ration deficient in minerals, or a lack of direct sunlight or its substitute, cod liver oil.

Keep Vegetables Growing—
Thinning vegetable plants at the proper time to prevent crowding and to encourage healthy, normal growth is a good practice for the home gardener to follow. Shallow cultivation often enough to keep the soil loose and the weeds down also is necessary.

Kill Weeds in Home Grounds—
Weeds in walks, driveways and other places around the yard may be eradicated by using some of the weed-killing preparations obtainable from reliable seed houses.

Pick and Feed Right—
Success in growing a desirable type of market hog comes with selection of the proper kind of pig which then is given good feed and care.

Provide Emergency Hay—
Soybeans make the best emergency hay for the dairy herd. They should be planted this month.

PUBLIC SALE

of an entire herd of 27 Head of Holstein Cattle, 3 Miles East of CENTRE HALL, along State Highway Route 49, on

WEDNESDAY, MAY 28, 1930,

consisting of—

- 8 Registered Cows,
- 4 Grade Cows,
- 2 Registered Heifers, 2 years old, will be fresh by time of sale,
- 3 Registered Heifers, 1 year old,
- 1 Grade Heifer, 1 yr. old,
- 2 Grade Heifers, born since August 1st,
- 4 Registered Heifers, born since Oct. 1st,
- 1 Registered Bull, 5 months old.

These cattle are above the average in type and production; the breeding is along the best and most popular lines. In type we aim to have a straight top line stand up well on hind feet, an animal good to look at, as a thing of beauty as a joy forever.

In production these 14 cows produced over ten tons of milk in March, delivered to the local milk station. The daily milk production of these 14 cows delivered to the local milk station is greater than the daily milk production of any other herd of cows whose milk is delivered to any of the five nearest milk stations. The Cow Testing Association records for the month of April show an average daily production of 50.5 lbs. of milk per cow per day. The individual production record per day is from a 10-gallon can of milk per day, down.

Herd fully accredited for seven years. Sale starts promptly at 1 o'clock P. M. Refreshments will be served on the premises by the Ladies' Aid Society.

JOHN SNAVELY.

NEW ADVERTISEMENTS.

LEGAL NOTICE.

BIDS ASKED FOR SUPPLYING COAL.—Bids from dealers are asked to supply coal for the various school houses in Potter township, same to be in the hands of the secretary on or before Friday, May 24, 1930. Bids may be accepted or refused, at the pleasure of the Board. For further information apply to

F. P. FLORAY, Secretary, Centre Hall, R. D. 1.

FOR SALE.—Tenant house and barn on Potter farm; same must be removed from premises. Apply to Mary Delinda Potter, Centre Hall.

HOUSE FOR RENT.—The Mrs. H. J. Lambert house on East Church street. Inquire of Mrs. Lambert, at the restaurant.

OVERWORKED NERVES

UP TO your ears in work—every nerve at high tension. No wonder you snap at the wife and bark at the children.

Watch out! Overworked nerves may lead to Sleeplessness, Nervous Headache, Nervous Indigestion and a host of other unpleasant disturbances. Why don't you try Dr. Miles' Effervescent Nerve Tablets?

Just one in a half glass of water makes a pleasant, sparkling drink delightfully soothing to over-taxed nerves.

Dr. Miles' Nerve is now made in two forms—Liquid and Effervescent Tablet. Both are the same therapeutically.

State Secrets Hidden by Absorbent Roller

Every foreign office in Europe acts on the theory that an army of spies is constantly on the alert to steal its secrets, and infinite precautions are taken to baffle their efforts. Very shortly after the first use of blotting paper it was discovered that it was quite possible to cause a blotting pad to give up secrets by simply holding it in front of a mirror. Long after all the commercial world had forgotten the existence of such a thing, the British foreign office used a sandshaker to dry its important written documents, of which there are still many despite the use of the typewriting machine. Then specially manufactured black blotting paper was used, but this was not found to be absolutely spyproof and a return to the sandshaker was contemplated when some one suggested the simple expedient of a small absorbent roller. These rollers have since been used for drying diplomatic documents. When such a roller has been run up and down and across a document once or twice, the cleverest spy in the world is at liberty to try his hand at deciphering the impressions.

Farmers of Country Owe Much to "Dream"

Wisconsin farmers have erected a granite monument to the memory of John F. Appleby, who was known throughout the Mid-West a generation ago as an expert whittler in wood. He helped farmers throughout the world by inventing the first machine to tie sheaves of grain automatically. According to Farm and Fireside, Appleby was eighteen years old when he whittled his way to fame by his invention. He had grown tired from bending to bind grain by hand in a Wisconsin harvest field, and so he spent an evening "dreaming" of a machine which would do this work. He whittled out a model of his invention, which he perfected in 1858. It is still almost identical with the design used all over the world on grain binders today.

Tent Within a Tent

"Several winters ago I became acquainted with a method of winter camping which I believe was, and is, just about as ingenious as one would expect to meet with in many a moon," writes Robert Page Lincoln in Forest and Stream. "A trapper showed me the trick. It involved the use of two wall tents. The one tent as I remember it was nine by eleven while the other was twelve by fourteen. The smaller tent was erected inside of the larger tent. A good job had been done of pegging down and stretching both of these tents. The result was that the outer tent was a windbreak for excellence and that even in the coldest winter weather the inside was well protected, the camp stove, a box affair, keeping an even temperature within."

Too Exacting

One day a fashionably dressed man entered Howell's music store in Bristol and asked to see some piano music. Howell put before him the latest sonatas, just published. The stranger looked at them, then said: "I do not care for these. I do not like them, show me something better." "Something better?" Howell exclaimed, rather impatiently. "There is nothing better! I am sorry not to be able to serve you. Good day, sir." The stranger smilingly replied: "I have written these myself, I am Haydn." At which Howell fell on his neck overjoyed to make the acquaintance of the great composer. They became fast friends.—Kansas City Star.

Reindeer Swept Away

The Lap tribes in the northernmost part of Norway recently suffered the almost irreparable loss of 50 per cent of their reindeer. As is customary, more than 2,000 head of reindeer had gone to their feeding ground on Mageroe Island. The only way of transporting this great herd is to make the reindeer swim across the narrow strait separating the island from the mainland. While the herd was recently being driven back by the same route, more than 1,000 reindeer were caught in the swift current of the strait and were carried out to sea where they drowned.

Disillusioned

I always thought Jenkins was rather bright. He made a radio set out of some my wire and a few spark plugs. He could catch trout with some binder's twine, some remnant cheese and a hairpin. By sniffing at an exhaust pipe he knew which cylinder was missing. I always thought he was rather clever. But this morning he called in a repair man to change the ribbon on his typewriter.—Boston Globe.

Had Faith in Perfumes

Sages and lawgivers, Solon, Lycurgus, Socrates, failed in vain against the extravagant use of perfume. The perfume shop became so important a rendezvous of the smart world that men said, "Let's go to the perfumers," as they would say, "Let's have a bite." Each essence had its particular significance and special power. The scent of the crushed vine leaves brought clear thinking; that of white violets aided digestion, they believed.

ALTOONA BOOSTER MERCHANTS SAY:
Trade in your home stores first, but come to Booster Store for the things your home merchant cannot supply.

ALTOONA BOOSTER STORES
Invite You to Attend Their Opening Display of SUMMER MERCHANDISE
STARTING
Wednesday May 21
And Continuing Over Thursday, Friday and Saturday

Magnificent Assortments of Summer Merchandise
which represents all that is newest and best in style and quality.
SUMMER APPAREL FOR ALL THE FAMILY —AND— SUMMER FURNISHINGS OF ALL KINDS FOR THE HOME AND PORCH

Every Wednesday Is Suburban Day IN THE STORES OF THE ALTOONA BOOSTER ASSOCIATION

A RACING PILOT'S Slant on Everyday Motoring—
by Ralph Hepburn

Positions of Hands and Feet
PROPER driving posture is an important thing frequently left unlearned. Fatigue can be avoided by assuming a comfortable position. This is important and should receive due consideration from the student driver.
The position of the hands on the steering wheel is perhaps one of the things that rarely receives any particular attention. Good drivers declare that holding the hands in a position similar to the hands on a clock when it is twenty minutes past ten is the most advantageous position in so far as comfort and possible emergency necessity are concerned. The position of the feet is another matter that deserves consideration. Until a driver is sure he can find the brake pedal quickly without looking, his right foot should be in the immediate vicinity of the brake pedal while driving.
It is not good practice, however, to keep the left foot on the clutch pedal, as this causes slippage of the clutch and premature and unnecessary wear and tear.
In driving down steep hills, it is the accepted practice to use second gear and press the brake pedal only intermittently. Constant use of the brakes on long steep hills frequently causes them to burn out on many of the popular priced cars. The use of second gear, however, acts as a brake and precludes the necessity of constant pressure on the brake pedal.

THE REPORTER is well equipped to do the Best Kind of Job Printing.

A FARMER, faced with his spring plowing, inspected a number of animals offered for sale without finding what he wanted. A neighbor, however, telephoned him to say that he knew of a city coal dealer who wished to dispose of several horses. The farmer then called up the coal man and was able to buy a pair of horses at a most satisfactory price.

Much of the corn in Haines and Penn townships was up on Sunday. The corn rows were easily followed from an auto and the set appears to be 100 per cent.
In 1909 but two pupils out of every hundred enrolled in the public schools in the State entered a High school. At the close of the 1929 term twenty pupils out of every hundred reached and entered a High school. This increase was very gradual.
