CLOUDS OF PROTECTION
for crops and profits

Effective protection against all menacing pests and diseases of field crops—but that is not all. Protection as well against inadequate coverage, and waste of time and material. How? By dusting with the improved

Niagara Dri-Fog Dusters

New in design, these machines are matched to their job—and can do it scientifically. A study of field conditions led to their construction.

The Dri-Fog Duster is sturdily built, yet it is light enough not to be another "horse killer". The construction is simple—easily adjusted and repaired. The improved dusting mechanism is designed to break up the dust into a uniform cloud of the desired intensity, equally divided among the nozzles. Every row, in this way, receives the same, correct amount of dust.

Niagara truck-crop dusters, having copper as a fungicidal base and calcium arsenate to kill external chipping pests, give quick and effective results with the Dri-Fog.

Visit our distributor soon. He will gladly explain the value a Dri-Fog can be to you.
