SHEFFIELD MILK PRICES.

The net cash price to be paid the more than 13,000 members of the Sheffield Producers Cooperative Association, Inc., for the milk sold by them in the month of May, is \$1.94 1/2 per hundred pounds for three per cent grade B milk in the 201-210 milk zone with the usual freight, grade and buttermilk differentials. This is equivalent to \$2.14 1/2 per hundred pounds for milk sold on a 3.5% basis.

The amount of milk sold through the Sheffield Producers Cooperative Association, Inc., exceeds the amount sold in any previous May by more than 25,000,000 pounds. It is probable that the peak of production will be passed early in June and with hot weather the consumption of milk should materially increase.

U.S. Telephone Industry Has 400,000 Employees

Equipped with more than 20,000,000 telephones, the American public requires the daily services of more than 400,000 individuals to operate and maintain its telephone facilities, according to a recent article in the Bell Laboratories Record by C. W. Foss, of the American Telephone and Telegraph Company.

The telephone user merely sees a telephone instrument, and hears the voice of an operator. Beyond that he gives little thought to the telephone plant or personnel. Yet the one telephone that he uses represents but an infinitesimal part of the four billion dollars invested in the country's telephone plant and equipment, all of which must be ready at all times for his service, since no one in the telephone business knows which two telephones are to be physically connected in completing the call.

Telephone operators comprise nearly one-half of the total telephone personnel, but without the assistance of thousands of other men and women, the industry could not have developed to its present magnitude nor could it be maintained.
