**IN THE MOUNTAINS OF FAR-AWAY SWITZERLAND**

By Mrs. R. T. Bayard.

Interlaken, Switzerland, Friday, August 8, 1930.

"Our visit to Geneva to see the Palace of the League of Nations was interesting in every detail. Geneva in the first place, is a beautiful sight, right on the lakeside and the League Palace fronts on the lake. There two immense buildings and the wonderful garden slopes to the lakeshore. The two buildings are in use all the year for the general business. Once a year when the entire league meets, a large auditorium in another building is used, as there is no room in the other two buildings large enough. So a new Palace is being constructed, but it is not expected that it will be completed for four or five years. Some of the workings of the League were explained which made it an interesting visit.

"Yesterday, by steamer, we left for Lausanne, another beautiful little city on the hillside overlooking Lake Geneva. It is a great center for English and American students. The motor trip through the orchards and vineyards was glorious. The steamer on Lake Geneva carried us to Montreux and from there we visited the Castle of Chillon, made famous by Lord Byron's poem about The Prisoner of Chillon. It was a fortified castle which was built out in the lake by the Dukes of Savoy in the Twelfth and Thirteenth centuries. The floor is solid rock and there are three walls of defense, then the tower, a last resort in times of assault. The lower floor contains the prisoners, dungeons and torture rooms. We saw where the prisoners were literally torn to pieces and burned with red hot irons and beheaded or hanged, and the doorway through which their bodies were thrown into the beautiful lake that we now travel thousands of miles to see.

"From Montreux we took Bernese Oberland Electric railway, with wonderful views of Lake Geneva from the mountainside above, for Interlaken. It was a very thrilling trip as we wound up, through and around the mountains, sometimes making such sharp, snake-like curves that we almost held our breath when we looked down into the deep gorges. Lake Geneva was in sight for a long time and there were many immense waterfalls and high peaks covered with snow. Then there were lovely, green valleys with the pretty Swiss chalets with their balconies and flowers. I shall never forget how much of beauty the balconies and flowers add to both cities and country, and the villages here and there in unexpected valleys in the mountains make this mountainous country so very different from ours. Interlaken is one of the most noted mountain resorts in Europe, set between the lakes of Thun and Brienz and dominated by the towering Jungfrau. Mountain railway rides were enjoyed up the valley to Lauterbrunnen, over the Kleine Scheidegg and down to Grindelwald.

"I forgot to say that we saw Calvin's church in Geneva which was Catholic until the sixteenth century and Protestant ever since. Also the great Memorial put up in memory of the Reformation. This memorial is a great, high wall at least a block long. In the front of which are figures of men who took the most important part in the Reformation. Also the Lord's Prayer is carved on this wall in a number of different languages. At one end of the wall is a large memorial block for Luther and at the other end a smaller one for Swingle."

**MILLHEIM.**

**FARM CALENDAR**

**TIMELY REMINDERS FROM PENNSYLVANIA STATE COLLEGE SCHOOL OF AGRICULTURE**

**Feed Pullets Grain—**

Pullets approaching maturity should be encouraged to consume large quantities of grain.

**Improve Dairy Herd—**

Raise heifer calves from only the very best cows. This is the time to improve the quality of the herd. "Keep down the numbers but improve the quality" is a good motto.

**Mow Lawns in Fall—**

Lawns should be cut during the fall. If the grass is allowed to remain uncut through the winter, the lawn will be rather spotted in the spring and considerable reseeding will be necessary.

**Treat Wheat for Smut—**

Stinking smut is a costly pest of wheat. Treating the seed with copper carbonate dust will insure a clean crop. Thoroughly mix the grain with two and one-half ounces of dust for each bushel, say State College plant pathologists.

**Train the Show Colt—**

Training the show colt is essential to making a good impression on the judge. Animals that respond to the bidding of the exhibitor stand a better chance to walk off with the blue ribbon than the sulky, balky creatures.

**Trees Save Water—**

This is the year when tree cover, especially evergreen, around the spring has a most beneficial effect. With their tremendous capacity for catching and holding water in the soil, evergreen trees mean the difference between a flowing and a dry spring. They keep the water cooler, too.

**Prepare Laying Houses—**

Thoroughly repair, clean, and disinfect all laying houses before the pullets are confined to winter quarters.

**NEW ADVERTISEMENTS.**

**F**ROM time to time a farmer was annoyed to discover after marketing livestock that better prices had been quoted by dealers located not much farther away. He became a telephone subscriber and, according to his account, the first business call he made netted him a saving of 35 cents per hundred-weight on ten hogs. These he sold to a dealer after comparing prices in two neighboring towns.
