FARM CALENDAR

TIMELY REMINDERS FROM PENNSYLVANIA STATE COLLEGE SCHOOL OF AGRICULTURE

Sweeten Poor Hay—

Straws and poor hay can be made more palatable if cut and sprinkled with molasses water, made by mixing one gallon of molasses with 3 or 4 gallons of water. Wheat bran added to the mixture will improve its palatability and feeding value.

Fertilizer Aids Growth—

Experiments conducted at the Pennsylvania State College to determine the value of commercial fertilizers for use in coniferous seedbeds show that they aid in producing vigorous seedlings in the field.

Lime Helps Clovers—

Soils deficient in lime are unable, even with liberal fertilizer treatment, to produce hay of good quality, tests at the Pennsylvania State College revealed. Lime with manure produced 16 per cent more total clovers in the hay mixture and 29 per cent more red clover

than they produced with manure alone.

Keep Sows Healthy—

Brood sows need exercise. They also require some well-cured alfalfa or clover hay. A good mineral mixture will help keep the sows in condition. Let them have free access to both hay and minerals.

Avoid Household Insect—

Cleanliness is important in keeping insects out of the household. There is no substitute for it in the kitchen and pantry if insects that attack cereal products are to be avoided.

Have Holiday Blooms—

Bulbs that were potted in September and October and then set in a dark, cool place to make root growth are now ready to be brought gradually into light and heat. They should be in flower for the holidays.

Watch Poultry Health—

Poultry need direct sunlight and ventilation to keep in the best health.

Give Chickens Drink—

Winter egg production is often cut short by a limited supply of water.

Merry

Christmas

It's going to be hard to be merry, even on Christmas, if you have to wear overcoats to the dinner table and the whole family's sniffing and sneezing.

But why BE cold! Why snifle or sneeze! All so unnecessary when a HEATROLA will keep the whole house—upstairs and down—bountifully supplied with moist, circulating warm air—the most healthful kind of heat, as any doctor will tell you.

Especially now, when you can buy a genuine HEATROLA—made by ESTATE—the original cabinet heater, with the Intens-Flre Air Duct and other exclusive heat-making, fuel-saving, features, on these extraordinary terms:

Pay only a small amount down—then NO MORE UNTIL SEPTEMBER, 1931, when monthly payments may be started on our budget plan. And \$10 allowed for your old stove (\$5.00 on the Junior or Wood Heatrola.)

Think it over. But don't think too long. This unprecedented offer is good until December 20th only.
