FARM CALENDAR

TIMELY REMINDERS FROM PENNSYLVANIA STATE COLLEGE SCHOOL OF AGRICULTURE

Feed Good Cows Well—

Do not reduce grain feed for cows in the flush of production even though prices paid for milk may be lower. It is better to weed out the poor cows in the herd and continue to feed the good ones up to production capacity. This practice reduces milk costs.

Fertilize the Garden—

Use the best fertilizer for your garden soil. For light soils with little manure use a 4-8-4 mixture; on heavier soils with plenty of manure, apply a 24-12-4, and for unusually fertile soils with abundant manure, use only superphosphate. For one-quarter of an acre, or about 100 by 100 feet, apply about 300 pounds.

Order Planting Materials—

If you order trees, shrubs, vines and perennials early from a reliable nurseryman, you can specify the date of delivery. Then the shipment will arrive exactly when you want to take care of the materials.

Hatch Chicks Early—

Early hatching of chicks and proper handling of the pullets will bring them into laying condition next fall during the months of high priced eggs, say poultrymen of the Pennsylvania State College.

Nominate Ton Litters—

Litters farrowed between January 1 and June 30 can be nominated for the 1931 Keystone Ton Litter club. See your county agent about the arrangements. Ton litter methods aid in producing pork economically.

Provide Spray Materials—

Efficient potato growers have found it helpful to have a sufficient supply of lime and blue stone on hand before the spraying season opens. Plan to have a surplus instead of a shortage.

YOU BENEFIT MORE THE MORE ELECTRICITY YOU USE AND EACH KWH* COSTS LESS

Actual bills show that many customers enjoy the use of these appliances . . . the benefits of good lighting . . . for only \$3 to \$4 a month.

Adequate light, of course, depends upon the desires of the individual family. But the modern trend is not only toward more light but also toward shaded light both for home comfort and beauty.

And remember! Your current cost per KWH* decreases, step by step, the more electricity you use.

*KWH—Kilowatt hour—the unit used to measure the electrical energy.

The BEST Gray Hair Remedy is Home Made

To half pint of water add one ounce bay rum, a small box of Barbo Compound and one-fourth ounce of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Apply to the hair twice a week until the desired shade is obtained. It will gradually darken streaked, faded or gray hair and make it soft and glossy. Barbo will not color the scalp, is not sticky or greasy and does not rub off.

Washington's Birthday

IN WASHINGTON'S DAY the country's population was but 3,340,000, yet every one to a man of these five million people looked to Washington for guidance, they had utmost confidence in his judgment, integrity and ability to rule wisely and well.

THERE ARE ABOUT 125,000,000 people in his country today who enjoy the freedom and independence which Washington fought to win, which proves that the confidence the people reposed in him was well founded.
