FARM CALENDAR

TIMELY REMINDERS FROM PENNSYLVANIA STATE COLLEGE SCHOOL OF AGRICULTURE

Exhibit Maple Syrup—Producers who wish to compete at the State Farm Show next year should save 3 or 4 gallons of their best maple syrup. Your county agent can give you the details regarding the classes for maple products.

Plant Ornamentals—Prune all broken or damaged roots before replanting trees or shrubs. Set the individual plants not more than 2 to 3 inches deeper than they originally stood in the nursery row.

Improve Apple Trees—Undesirable varieties of apples can be improved by grafting scions from good known varieties on them. Whip-grafting or tongue-grafting is recommended by Penn State fruit specialists for top-working young trees or for root or stock grafting.

Grow Early Vegetables—Proper ventilation and watering aid the growth of early vegetable plants. Protection at night and ventilation in the day time will keep the temperature at the right level. Watering should be done on only sunny mornings.

Protect Apiaries—Bees need protection from the cold spring winds. Locating the apiary near a woods or behind outbuildings will give natural protection. Artificial protection can be obtained by planting an evergreen hedge or by building a high board fence.

Remember the Date—Reserve June 11 for a trip to State College. Farmers Field Day will be held then.
