LOCAL AND PERSONAL

The Junior class of the Centre Hall High school will hold a festival on the school grounds on the evening of Memorial Day. The Spring Mills band will furnish the music. See further announcement on posters.

The farm residence of T. M. Zubler, west of Spring Mills, made a narrow escape from destruction by fire a few days ago. Fire had been built in a fire place in the out-kitchen and in some manner the flames got into the wall. A chemical fire extinguisher saved a conflagration.

FARM CALENDAR

TIMELY REMINDERS FROM PENNSYLVANIA STATE COLLEGE SCHOOL OF AGRICULTURE

Save Moisture.—Cultivation of the surface of the saucer left around transplanted ornamentals or maintenance of a permanent mulch is necessary in retention of moisture.

Keep Eggs Clean.—The percentage of dirty eggs can be decreased by using shavings for nesting material.

Cows Inherit Ability.—Cows are good or bad producers depending on their inheritance and the way they are fed. Provide for a better herd in the future through the careful selection of a herd sire now. He should be from high producing cows on both sides of his family, say State College dairy specialists.

Chicks Become Ill.—Coccidiosis usually affects chicks from 3 to 12 weeks of age. The first symptoms are loss of yellow color from the beaks and shanks. Affected chicks usually pass blood in their droppings.

and act very sleepy. Kill Weeds Chemically.—Weeds in walks, driveways and other spots may be killed by using some of the weed-killing preparations to be obtained from the better seed houses.

Plant Crops Separately.—During the month of May practically all of the garden will be planted with early maturing crops and those that occupy the ground all season. With horse cultivation, the early maturing vegetables may be planted in a part of the garden separate from those occupying the ground all season. Succession crops are then planted where the early crops are harvested without interfering with the others.

Received a car load of Lehigh cement, which is offered at the right price at our coal yards.—C. P. Long, Spring Mills. 4t, 19

Chevrolet

has struck a popular new note in motor-car styling

Chevrolet's front-end ensemble is a fine example of the latest trend in modern design.

Many factors have contributed to the remarkably widespread popularity of the new Chevrolet Six. Among these are smooth performance, low price, matchless economy, exceptional riding ease and driving comfort. But no feature has been more strikingly evident in the enthusiastic public reception of the car than its smart new style.

Fisher Body craftsmen, with their background of fine-car designing, have made this new Chevrolet an exceptionally attractive automobile. Study it from any angle and you find it extremely pleasing. Look at it from the front and you are impressed by the modish ensemble of deep radiator, large headlamps and arched tie bar—all gleaming in rich chromium plate. Viewed from the side, the long hood, low-slung body

lines, sweeping fenders and massive wire wheels strikingly suggest the car's fleetness and power. And the appeal of Chevrolet's beauty is made more pronounced by the fact that all models are available in a variety of colors.

Interiors, too, are unusual in every way. The upholstery is carefully tailored. Seats are roomy, deeply cushioned and invitingly soft. And the interiors are tastefully appointed.

This emblem—Body by Fisher—is a symbol of superior body craftsmanship—exclusive with Chevrolet in the low-price field.

In fact, the new Chevrolet Six is such a thoroughly fine-looking automobile that it has become a very popular choice with every type of buyer. You find it not only the smart family car, but the smart personal car as well—a worthy companion to the expensive automobiles of the two- and three-car household.
