FARM CALENDAR

TIMELY REMINDERS FROM PENNSYLVANIA STATE COLLEGE SCHOOL OF AGRICULTURE

Improve Dairy Herd—
Raise heifer calves from only the very best cows. This is the time to improve the quality of the dairy herd. "Keep down the numbers but improve the quality" is a good motto to observe.

Treat Wheat for Smut—
Stinking smut is a costly pest of wheat. Treating the seed with copper carbonate dust will insure a clean crop. Thoroughly mix the grain with two and one-half ounces of dust for each bushel, say State College plant pathologists.

Continue Spraying—
Omitting the last spray of potatoes is like allowing insurance to lapse the day before a fire. As long as the vines are green they need to be sprayed to control late blight.

Prepare Laying Houses—
Thoroughly repair, clean, and disinfect all laying houses before the pullets are confined to winter quarters.

Train the Show Colt—
Training the show colt is essential to making a good impression on the judge. Animals that respond to the bidding of the exhibitor stand a better chance to walk off with the blue ribbon than the sulky, balky creatures.

Burn Garden Rubbish—
Rubbish from the vegetable garden should be cleaned up and burned. Many diseases and insect pests winter in this debris. Do not postpone the clean-up work until spring.

Mow Lawns in Fall—
Lawns should not be mowed closely late in the season. It also is a good plan to allow the clippings to fall back on the lawn to provide winter protection for the roots.

Time to House Pullets—
The first egg found on the range is a notice that it is time to start housing the pullets.
