

Viking Ship Reaches Chicago

Here is the Viking ship Roald Amundsen docked in the Chicago river after a voyage of 15,400 miles from Norway. Manned by a crew of three men, it followed the route of Columbus to America and then sailed up the St. Lawrence river and through the Great Lakes. The Roald Amundsen is built on the plans of an Icelandic vessel of about 1000 A. D.

A Quiet Vacation

By THOMAS ARKLE CLARK  
Dean of Men, University of Illinois.

They had come up to Cape Cod from New York to the inn where I was staying to have a quiet vacation. They had chosen a good place, for Provincetown is as uneventful and as near stagnation as any place one could desire. Telephones are the exception rather than the rule, and nothing happens excepting that the world turns over once a day. Frost was a publicity man and Schenck a stock broker. Frost had never had a real vacation before, he said, and his companion had been working steadily ever since President Wilson had declared war against Germany. But they certainly were going to have a quiet time for the next few days, they were prepared to tell the world.

They went to a show the first night; they took the bus out to the breakwater the next morning; they looked through the illustrated magazines on the living room table in the afternoon, and then they began to grow restless, and a little later to talk business.

It wasn't a half hour until Frost was working out another publicity scheme, and Schenck was giving directions to the home office over long distance half the afternoon, and wiring various people what and how to do. Their minds were so full of business that they found no time for quiet or for rest. When we were not regaled

Type to Title

James Wellington, wandering printer, who learned in the composing room of the News-Globe in Amarillo, Texas, that his father, Ormsley Augustus Wellington, had died leaving him heir to the original estate of the duke of Wellington, of whom he is a direct descendant. The death of his father makes him Lord of Nenagh, County of Tipperary, Ireland. He has sailed to take possession of his new property and title.

On new methods of publicity, we were given advice on the stock market.

They had come up to the Cape to have three weeks of a quiet vacation, but before three days they were doing business as enthusiastically and as regularly as if they had been in their little offices in New York, and by the end of the week they were ready to go back. They didn't know how to rest; they didn't enjoy quiet; there was really nothing in a vacation for them, for they had one-track minds with no switches.

It takes considerable training and not a little experience to enjoy a quiet vacation. One learns this as he learns other things—by regular practice and by beginning early in life.

Colored Lacings

A nice color touch to white two-eyelet oxfords this summer is introduced in colored grosgrain ribbon lacings. For a costume worn with red accessories merely take out your white lacings and replace them with red ones for the occasion.

Measure Man's Power in Series of Tests

Public Health Service Puts 500 Through Paces.

Washington.—How strong is a man? The answer has just been made by the United States public health service through a series of tests given to 500 men. Generally, heavily built men were found to be stronger than slender men of the same weight.

The tests were made to ascertain the pulling, pushing, handgripping, lifting and lung power of men between the ages of twenty and thirty-four, between the weight of 120 and 160 pounds, and between the heights of 63 and 70 inches.

The greatest pulling power was demonstrated by men in the heaviest weight class, between 160 and 169 pounds. Men in the two heaviest classes, 150 to 159 and 160 to 169 pounds, tied as the most powerful pushers. In each of these weight groups the taller men proved to be the best pushers, with a force of 121 pounds, the record figure.

In the handgripping contest the tallest and heaviest men gave the most powerful hand grips, with a force of 108.48 pounds. But the shortest men in the heaviest group were the most powerful lifters, lifting on an average 519.2 pounds.

The men having the greatest lung power were found among the shortest in the 150-159 pound class. Their lung force was measured at 154 millimeters.

So far as general strength went, it was found that the taller men were

POTPOURRI

The Third Day

The word "Tuesday" is based on the name of the Norse god of war, Tyr, the son of Woden, from whence comes the word "Wednesday." The French call Tuesday "Mardi," honoring Mars, the Roman war god. There is a "Shrove" Tuesday in the church calendar, it being the Tuesday before Lent.

All Around the House

Bread should be cut thicker when used for toast or when sautéed.

Spiced grape jelly with venison is another delightful accompaniment.

Small patty shells or cream puffs filled with a mixture of fruit and whipped cream make most delicious desserts.

Corn on the cob roasted in the campfire tastes like no corn cooked in any other way. Leave a few of the husks on and bury in the hot ashes. Serve with plenty of butter, pepper and salt.

Cup custards carry well if one likes to add to the menu. Fresh fruits and a glass can of fresh cooked green peas well seasoned and served cold are always enjoyed, or they may be carried hot or reheated.

Father Sage Says:

Another optimist is a bridegroom who has already begun to plan for his tenth wedding anniversary.

Ancient Fossils Common in U. S.

United States Fertile Field for Paleontologists.

Washington.—The discovery in Texas of the dorsal armor of a giant phytosaur, a crocodile-like creature which lived more than 50,000,000 years ago, emphasizes the fact that the United States is still a fertile field for paleontologists seeking the fossils of prehistoric animals. Traces of many species of these monsters have been found from time to time.

Judging from the number of tracks found, the dinosaur, or "terrible reptile," seems to have been the most common in all parts of the country. Beside the Connecticut river near Northampton are preserved dinosaur tracks said to be the most perfect ever found. Nearer New York, at Woodbridge, N. J., dinosaur tracks were discovered last year measuring 20 inches across the toes. They are thought to date back to the cretaceous period of the Mesozoic age.

The hunts of the dinosaur in New Jersey were first discovered, however, in 1858, and a mounted skeleton is in the State museum at Trenton.

In the western states and in the Canadian province of Alberta dinosaur bones have been most frequently found and most easily excavated. Some huge tracks, 38 inches long, have been discovered in Colorado; and in Dinosaur canyon, near Flagstaff, Ariz., 300 tracks were found by one expedition. One of the largest skeletons of this beast was found in Utah in 1923—the diplodocus of the species. This specimen was 71 feet long and the pieces discovered weighed about 52,000 pounds. This creature is supposed to have lived 170,000,000 years ago.

Mastodons, it is believed, were abundant here about 25,000 years ago, whereas this animal was thought to have become extinct in Europe 1,000 centuries back. Mastodon teeth 7 inches long have been discovered in the ocean off the New Jersey coast; and the vicinity of Niagara falls has furnished a fertile field for such discoveries.

Near Medicine Bluff, Wyo., was found the skeleton of one of the largest of the prehistoric reptiles, the brontosaurus, or thunder lizard, now in the Peabody museum at New Haven. When alive, its weight is estimated to have been about 40 tons, and it lived about 120,000,000 years ago. The jaw of a titanothere, to which family belong the modern horse, tapir and rhinoceros, was found in the White River Bad Lands of South Dakota in 1840.

New Style Hairdressing

This is the way milady will look this fall when she dons the cocky little Empress Eugenie hat, and has adjusted the demure feminine pin waves at either side. These waves will come in any color to suit the gown and mood of the moment.

Prize for Pirates

Bill Brenzel, star catcher of the Mission team of the Coast league, will be paid \$100 for his services as a pitcher for cash and one player. Brenzel is rated as the best receiver in the Coast league and is only twenty-one years of age.

Excavation Reveals Roman Jig-Saw Puzzle

London.—Excavations beneath the new building of the Royal Bank of Canada in Lothbury, E. C., have resulted in the discovery of a 1,800-year-old jig-saw puzzle in Roman pavement.

Many pieces of the old puzzle are missing, but there has emerged a picture of the substantial house of some Roman citizen.

Archaeologists are now studying the jig-saw puzzle and other sections of tessellated paving found in the area.

SUCH IS LIFE  
By Charles Hughes  
SOUNDS PLAUSIBLE

POISON in Your bowels!

Poisons absorbed into the system from souring waste in the bowels, cause that dull, headachy, sluggish, bilious condition; coat the tongue; foul the breath; sap energy, strength and nerve-force. A little of Dr. Caldwell's Syrup Pepsin will clear up trouble like that, gently, harmlessly, in a hurry. The difference it will make in your feelings over night will prove its merit to you.

Dr. Caldwell studied constipation for over forty-seven years. This long experience enabled him to make his prescription just what men, women, old people and children need to make their bowels help themselves. Its natural, mild, thorough action and its pleasant taste commend it to everyone. That's why "Dr. Caldwell's Syrup Pepsin," as it is called, is the most popular laxative drugstore sell,
