FARM CALENDAR

TIMELY REMINDERS FROM PENNSYLVANIA STATE COLLEGE SCHOOL OF AGRICULTURE

Plant Good Snap Beans—The two most perfected varieties of snap beans in Pennsylvania gardens are Round Pod Kidney or Brittle Wax and Giant Stringless Greenpod.

Know What Farm Does—A farm business without records is like a clock without hands. You cannot tell whether it is gaining or losing nor even where it stands at any one time.

Farmers Pool Wool—In the past 12 years, 4,578,000 lbs. of wool have been marketed by cooperative associations in Pennsylvania with substantial increases in returns.

Vitamin "A" Needed—Results of experiments with dairy cattle at the Pennsylvania State College show that in heavy cotaensed meal feeding the ration should carry a liberal supply of vitamin A.

Give Ewes Good Care—Four types of lambs are produced for the market: hothouse, Easter, early summer, and fall lambs. Regardless of the type of market lamb produced, it is essential that the breeding ewes be kept in a thrifty condition during the winter and early spring.

Demonstrate Tree Planting—Eighteen new demonstration areas were planted last spring to forest trees as apart of the extension program in forestry. A total of 142,000 trees was set.

Repel Orchard Attacks—Rag dolls made of cheesecloth can be saturated with creosote oil and hung from apple trees to repel deer. If only a limited number of dolls are to be used, these should be placed on the side of the orchard approached by the deer.
