**FARM CALENDAR.**

*Timely Reminders from Pennsylvania State College School of Agriculture*

**Sow Annuals Now—**

Sow in flats or the hotbed annuals, such as asters, celosia, cocks comb, marigolds, petunias, salpiglossis, scabiosa, snapdragon, verbena, and similar flowers.

**Promote Horse Health—**

Heavy feeding and no exercise on Sundays or rainy days are bad for horses. Be sure to reduce the feed when the horses are idle. State College livestock specialists urge.

**Practice Five Steps—**

Good seed, thorough preparation of soil at the proper time, rotation of crops, use of lime as needed, and liberal fertilization are five sound practices in growing farm crops.

**Make Maple Syrup—**

Sap will begin to flow soon from the sugar maple trees. Clean the sap pails and evaporator, so that everything will be ready. Clean equipment is essential in making light colored, good quality syrup. It is advisable to keep the pails covered during the entire run to prevent tree washings and dirt from getting into the sap. The best maple sap always sells for a good price.

**Try New Vegetables—**

Why not add one or more new vegetables to the list this year when buying garden seed? Broccoli, Chinese cabbage Swiss chard, endive and kale are worth trying.

**Reduce Milk Costs—**

Five factors influence the reduction of feed costs in producing milk. These are production of the cow, feeding grain in proportion to the cow's production, kind and quality of roughage, water, and grain mixtures used.

**Prune Grapes Now—**

Winter is the most desirable time for pruning the grape vineyard because there is less conflict with other work. If pruning is done before the flow of sap starts, excessive bleeding of vines will be prevented.
