of the furniture was salvaged. A large on the scene and stood guard at the farm barn stood close by to the west, Walker buildings.

Earlystown Road to Be Well Built

From all appearances and information available, the Earlystown-Boalsburg road will be built upon a new and substantial foundation. The improvements on this eight miles of road, it is believed, will be much more substantial than the average Pinchot road in this section. There are evidences that a course of ballast will be laid on the graded road and finished with chips and oil. The construction will be almost as substantial as the road built last year and the year before through the lower part of Penns Valley and through the Wodward Narrows. This road, if well built, will invite extensive travel. Locally, it will be most important, and at the same time afford a short cut to State College for traffic from Route 111 along the Susque; hanna by way of Lewisburg. At Boalsburg this road intersects with Route No. 250, for traveleither to Pittsburgh or Northwestern Pennsylvania.

A stone crusher is being set up on the Ross farm, where a limestone quarry is being opened.

Small groups of laborers are working also being done, prepartatory to oiling lege, Mra Roy Bloomquist. Bellefonte;
