\$140,881,180 ACCUMULATED BY CHRISTMAS CLUBS IN U.S.

Four hundred and forty million dollars will be distributed to about ten and one-half million members of the Christmas Club by more than seven thousand banking institutions and organizations within the next two weeks, according to an estimate given out by Herbert F. Rayll, president of the incorporated organization, Christmas Club.

The average amount received by each member amounts to \$42.00. While this figure represents a reduction of about 11% compared with a year ago, the buying power of \$24.00 this year, in the terms of Christmas spending, is greater than the average amount received by each member in 1931. Considered from another angle, if all the cash in circulation in this country last year were evenly divided among our total population of 120,000,000 people, each person would have about \$40.00 in-the-pocket cash. While every member of the Christmas Club, on the average, has accumulated in nickles, dimes and dollars, during this year, a sum of \$42.00.

In the distribution of the Christmas Club for this year, New York State leads the other States with \$94,710,000, while Pennsylvania reports \$58,922,000.00. New York City's metropolitan area will receive approximately \$62,000,000.00.

The Bank of America National Trust & Savings Association, through its 395 branches in California is distributing about \$5,000,000.00. The Bank of the Manhattan Trust Company has over \$3,000,000.00 ready for more than 80,000.

It is estimated that but 38 per cent of these savings will be used for Christmas purchases, leaving 62% for permanent investments, taxes, mortgages, insurance premiums, etc. The distribution will be used approximately as follows:

Christmas purchases	38%	\$167,500,000
Permanent Savings and Investment	28%	123,500,000
Year End Commitments	11%	48,500,000
Taxes	10%	44,000,000
Mortgage amortization and interest	6%	26,500,000
Insurance Premiums	5%	22,000,000
Education, Travel and Charity	2%	2,000,000
	100%	\$441,000,000
