LOCAL DEALER TAKES PRIDE IN SHOWING NEW PLYMOUTH-6

The new Plymouth Six, announced by Walter P. Chrysler in Detroit recently is on display in the showrooms of R. S. Hagan, local dealer.

Bearing the lowest price by far ever placed on a Chrysler Motors' product, according to Mr. Hagan, the new Plymouth Six is reported to be the most sensational motor car of recent years.

Mr. Chrysler, in his statement recently, indicated that for the first time since the original Chrysler car was built in 1924, the Corporation started out with practically a new set of manufacturing facilities, embodying the most improved methods and machinery ever utilized in the industry. The Plymouth plant has been completely reorganized to take full advantage of the tremendous advances that have been made in machine-tool design and manufacturing methods during the past few years, according to Mr. Hagan.

The huge investment made in this new Plymouth Six, said Mr. Hagan, speaks for itself. Already more than \$9,000,000 has been expended in design and experimental engineering and in retooling the Plymouth plant in Detroit. In addition, commitments for materials, affecting thousands of workmen in allied industries, run into tens of millions.

The new Plymouth Six, according to Mr. Hagan, is a full-sized automobile. It will be outstanding in performance and will be economical in operating cost. The new Six has all the comfort and convenience features of cars selling in the much higher priced brackets. It has tyle, extremely smart lines and has nothing of the "cheap-car-look."

PROMISE BOYS RARE THRILLS.

AMERICAN BOY-YOUTH'S COMPANION readers are due for a rare adventure thrill in 1933, according to word just received from America's favorite boy's magazine. Boys will welcome the news that a modern Robinson Crusoe story, in which two boys and a man battle with savages and build a civilization with their bare hands, is on the way!

In this story the three heroes escape into the depths of the Amazon jungle; there they are stripped and left to die by hostile natives; and there, from the natural abundance of the jungle, they build their fortress. From advance notices, it's a story readers will never forget!

The American Boy-Youth's Companion for 1933 has other good things, we learn, for 1933. Adventures in all parts of the world; stories of school and college; helpful stories of the profession; sports interviews with famous coaches and players; vivid articles on travel and science.

We suggest the American Boy-Youth's Companion as an ideal present for that son, nephew, cousin, and neighbor. It's a character-building, imagination-stirring present that renews itself every month in theyear. An attractive gift card bearing your name will be sent to the boy if you request it. Subscription prices are only \$2.00 for one year or \$3.00 for three years. At the latter rate the magazine costs only a dollar a year. Mail your orders direct to THE AMERICAN BOY-YOUTH'S COMPANION, 550 W. Lafayette Blvd., Detroit, Mich. Service on your subscription will start with the issue you specify.

FARM CALENDAR.

Timely Reminders from Pennsylvania State College School of Agriculture

Grow Quality Vegetables—

Home garden demonstrations conducted this year by agricultural extension workers have proved the excellence of several new vegetable varieties. Many commonly grown varieties have again demonstrated their value. Lists of recommended vegetables can be obtained from your county agent before it is time to order seeds.

Choose Sire Carefully—

Dairy cows are good or poor producers according to the quality of ancestry. Cows are born with potential good or poor milking ability. Since the bull contributes one-half of the inheritance to each calf born in the herd, choice of the sire should be a careful procedure.

Apples in Season—

Apple varieties are suitable for different uses but all are not at their best at the same time. Apples now in season are Smokehouse, McIntosh, Grimes Golden, Delicious, Jonathan, Delicious, Jonathan, York Imperial, and Rhode Island Greening.

Protect Bees from Cold—

Packing of bees in the colder sections of the State helps them to pass the winter successfully when they are unable to move a supply of honey located on the opposite side of the hive. Packed colonies are able to make this movement.

Smooth Rough Lawn—

Depressions or irregular spots in the lawn can be improved by top-dressing with some good garden soil. This material may be obtained directly from the garden or can be prepared by mixing soil with compost or loam from the woods.

Improve Farm Woods—

This is a good time to improve the farm woodlot by cutting out crooked, defective and dead trees. Such thinning will benefit the remaining trees and provide plenty of fuel for the coming year.
