PINCHOT SIGNS AUTO OPERATOR'S RESPONSIBILITY BILL

Governor Pinchot last week signed the Buckman, Senate, auto operator's sinclair responsibility bill.

The bill, which becomes effective January 1, 1934, authorizes the department of revenue to revoke the licenses of drivers who fail to satisfy within fifteen days court judgments rendered against them as the result of accidents in which there occurred death or injury to human being or property damage in excess of \$200.

The persons whose licenses are revoked under these conditions will not be able to obtain new ones until they furnish an insurance policy or surety bond that will cover them for \$5000 damage for death on injury of one person, \$10,000 for two or more persons and for at least \$1,000 property damage. The policy or bond must be retained for at least three years.

The bill is not a compulsory insurance bill and applies only to those operators who have not settled judgments.

Will Rogers Picks A Story For This Spot

By WILL ROGERS

THE big day for a lot of men is when they can get up and tell the boy scouts what a hard time they had getting started. The poor kids must be scared to death from all the hard tales they hear these well-fed guys telling them about how the successful men all started sweeping chimneys or sorting garbage.

Well, there was one rich fellow that always used to tell every meeting that he spoke to all about his hard luck at the start.

"When I landed in this here town," he says, "I had only three dollars to my name."
He got away with this tale for twenty years, and one day a fellow of his own age happened to hear it.

"Yes," says this wise geezer to the one that sat next to him, "That's the truth, all right. And you know how he spent his three bucks? For two of them he got drunk, and the third he used to wire home for a thousand dollars."

May 15, 1933

Time and again I am told—by my own organization and by others—that I penalize myself by quality.

Friendly critics protest our putting into the Ford V-8 what they call "twenty-year steel." They say such quality is not necessary; the public does not expect it; and that the public does not know the difference anyway.

But I know the difference.

I know that the car a man sees is not the car he drives—he drives the car which the engineer sees. The car which is seen, comprises beauty of design, color and attractive accessories,—all desirable, of course. The best evidence that we think so is that they are all found on the Ford V-8.

But these are not the car. The car proper, which is the basis of all the rest, is the type of engine and its reliability; the structure of chassis and body, ruggedly durable; the long thought and experiment given to safety factors; the steady development of comfort, convenience and economy. These make the car.

A car can be built that will last two or three years. But we have never built one. We want the basic material of our car to be as dependable the day it is discarded as the day it is bought. Ford cars built 15 years ago are still on the road. It costs more to build a durable car—but two items we do not skimp are cost and conscience. A great many things could "get by"—the public would never know the difference. But we would know.

The new Ford V-8 is a car that I endorse without any hesitancy. I know what is in it. I trust our whole thirty years' reputation with it. It is even better than our previous V-8. It is larger, more rugged and mechanically a better job all round.

I readily say this in an advertisement because I know the car will back it up.
