Memoirs of news which interested those of a generation ago, taken from the files of The Reporter, year 1903.

Sept. 24, 1903.—The 50th annual Encampment and Exhibition of the Patrons of Husbandry of Centre County is over. The management is entirely satisfied with the result.

Marriage licenses granted this week included that of George O. Benner, of Centre Hall, and Margaret T. Miles, of Martha Furnace.

Mr. and Mrs. J. Emory Hoy and daughter Elizabeth, of Philadelphia, will return to their home in Philadelphia.

Dr. Hoffer Dale, who in June graduated from Penn State, Wednesday went to Philadelphia where he will take a course in the medical department of the University of Pennsylvania.

The rural mail service inaugurated from the Centre Hall post office beginning of the month, is giving entire satisfaction. The mail carrier, Will Keller, last week secured a regulation wagon which he finds a great help to the proper performance of his duties.

The trustees of the Lutheran church have decided to lay a stone walk in front of the church, and accordingly gave Dr. Alexander an order for some 1400 feet of Ohio sawed stone.

John Hubb, who some time ago purchased the David Kimpert farm, later owned by Lydia Poust and Harvey Royer, located at Red Mill, is building a dwelling house on that tract. The carpenter work was done by Messrs. F. F. Palmer of Potters Mills and Samuel Shoop of Centre Hall.

C. D. Runkle, of Pittsburgh, has been in town for the past week. He is buying up horses to ship to Pittsburgh.

Miss Fannie Hoffer is the guest of Mr. and Mrs. J. D. Murray.

Penn State College opened with 244 students enrolled in the freshman class.

PRIMARIES FORECAST ELECTION OF DEMOCRATIC GOVERNOR

Last week's primary election broke the back of the Republican machine in Pennsylvania and paved the way for decisive Democratic victories in many municipalities in November as well as in the gubernatorial and congressional elections next year.

Crushing blows were dealt by the aroused electorate to long unchallenged G. O. P. bosses in cities, counties, towns and townships throughout the State. Various received a death blow from the Democratic and Independent voters of Philadelphia.

Republican organization leaders in many former strongholds were unable to dictate to the voters at the primary election, a fact presaging independent action by the voters and Democratic and Independent victories in November. In virtually every community in the State, the primary returns reflect a popular revolt against Republican gang rule and government by and for a few Republican millionaires, politicians and special interests.

Political history was made in Pennsylvania last week. It was the beginning of a new era and a New Deal, with the people doing the dealing.

DESCRIBES FARM ADJUSTMENT PLAN

Agricultural College President Says Federal Program Seeks to Coordinate Production with Reduced Exports

The Federal farm adjustment program is partly guided by the belief that exports of agricultural commodities will not soon recover its volume of five or ten years ago, in the opinion of F. D. Farrell, President Kansas Agricultural College, writing in the August issue of the American Bankers Association Journal.

"Nobody knows whether the farm adjustment program will succeed," writes Mr. Farrell. "Its sponsors describe it frankly as an experiment. It seeks to socialize agriculture at least to the extent that farmers, in what is believed to be the public interest, will restrain their production activities and that processors, distributors and consumers will contribute something toward paying farmers for exercising this restraint. The adjustment programs definitely are based on the fact that prices are determined primarily by supply and demand. They also are based on the assumption that the export business in agricultural commodities will not soon return to its volume of five or ten years ago.

Dependence on Public Support "The plan offers wheat prices insurance for 1933, 1934 and 1935, for the domestically consumed portion of the wheat crop. The insured price is to be sufficiently high to give the domestically consumed portion of the wheat crop pre-war purchasing power. If the plan is as effective as its sponsors hope it will be, the reduction in supply may influence wheat prices so that the entire wheat crop will have pre-war purchasing power.

"If the adjustment program succeeds, its launching probably will mark the end of an era of extreme individualism in agriculture in the United States," says Mr. Farrell. "Recent fundamental changes led Secretary Wallace to say, 'What we really have to do is to change the whole psychology of the people of the United States.' This is a large order. It involves the whole program of farm adjustment as well as the larger national economic program, of which farm adjustment is a part. If the people decline to participate in the program to the extent necessary to give the experiment a fair trial, we shall never know whether farm adjustment as now proposed would have succeeded or not if it had been given a fair trial."

SUICIDE BY FORMER HUBLERSBURG WOMAN AT NEW CHESTER

Mrs. Grace Irene Weaver, wife of Prof. Amos T. Weaver, of New Chester, Pa. a native of Hubbersburg, this county, committed suicide by hanging herself in a barn at their farm. The family moved to New Chester from the middle west three years ago.

Mrs. Weaver, nee Grace Markle, was born at Hubbersburg, residing there for about 25 years before leaving to make her home with her husband in the middle west. Mr. Weaver was formerly a resident of Rebersburg where he taught school. The body was interred at Hubbersburg on Friday.

FARM CALENDAR.

Timely Reminders from Pennsylvania State College School of Agriculture

TREAT SMUTTY WHEAT — If stinking smut is present in wheat intended for seed, the grain should be thoroughly cleaned and then treated with 2 1/2 ounces of copper carbonate dust for each bushel of wheat. The treating may be done with home-made machines or in one of the 70 commercial machines in the state.

SELECT RAM EARLY—Early selection gives the sheepman an opportunity to pick a good ram as head of his flock. Good breeding has an important bearing on the production of market lambs. Rams are selling at extremely reasonable figures this fall.

CULL POOR COWS. — A careful check on the production of each cow in the dairy herd will reveal the losers. Those breeders who never pay their bills should be culled out and sold for beef. Their continued presence in the herd reduces returns.

STORE VEGETABLES PROPERLY —Pumpkins and squash should be harvested before heavy frosts and stored in a dry place which has barely warm temperatures. Peppers, tomatoes and eggplants may be pulled, vines and fruits, and hung up in a dry warm place where the fruits will ripen. Bruising should be avoided.

CONTROL GRAIN MOTH—Where wheat is infested with Angoumois grain moth the grain can be fumigated with carbon bisulphide. The liquid can be placed in shallow tins set on the surface of the stored grain in bins that are air-tight.

NOT MUCH LITTER NEEDED—Unless all scratch grain is given to the pullets in feeders, use only a small amount of litter on the floor when the pullets are first confined to the laying quarters.
