. FARM CALENDAR.

Timely Reminders from Pennsylvania State College School of Agriculture

CONTROL GRAIN INSECTS-Wheat should be fumigated with carbon bisulphide for protection against the Angoumois grain moth and the grain weevil. If treatment has been applied earlier allow one month to elapse before the second fumigation.

FEED BALANCED RATIONS-Dairymen can balance therations of their ows easily by using the information contained in a circular published by last week. Miss Fortney, who has the agricultural extension service of

ALLOW FRUIT TO COOL-Growers often find it difficult to lower quickly the temperature in the storage room after a large volume of warm fruit has been hauled in Some men partfally overcome this by setting the fruit Monday, the 30th day of October, 1933, isfaction guaranteed. Stop to see in the shade as it is picked, allowing it o stand in the orchard and cool overnight, and hauling it to the storage in the morning before it has had time to warm up.

PREVENT FARM FIRES-A 108s of \$10,000,000 a year is charged against farm fires in this country. In Pennsylvania alone the farm fire damage is twice as high in proportion to the value of the buildings and contents as for other classes of property.

EXCLUDE LIGHT FROM CELERY -To blanch or bleach celery it is necessary to destroy the green coloring by keeping light from the stalks, the time specified above, with their rec-Boards, heavy paper, 4-inch drain tile, ords, inquisitions, examinations, and
