Rev. W. H. Buck, pastor of the Highland Park Presbyterian church, in Minneapolis, Minn., in a letter to the Geary family here, makes reference to the weather in his city. For seventy consecutive hours, he said, mercury was from 15 to 17 degrees below zero. He took consolation, however, since in Duluth, in his State, mercury dropped to 54 below, Tuesday of last week.

Mr. and Mrs. Russell Bohn and the latter's sister, Miss Bertha Smith, all of Centre Hall, made a motor trip to Akron, Ohio, and spent Christmas week visiting Mr. Bohn's two brothers, Edward and Carl, and brother-in-law and sister, Mr. and Mrs. Paul R. Huppich, returning home last Saturday. Mr. Bohn declares Akron's industrial plants, especially the rubber works, to be working at near, or altogether, capacity.

Perhaps you noticed the strange phenomenon in the weather last Saturday when, with mercury standing at 12 degrees above zero, a light misty rain fell. Motorists experienced the greatest difficulty in keeping their windshields clear; in fact, every mechanical device failed to do the job. Ice froze immediately on the glass and driving was both unpleasant and dangerous. The explanation of all this appears to be that a warm stratum of air above the colder one closer to the ground caused the precipitation to come in the form of rain instead of snow.

F. V. Goodhart, undertaker and furniture dealer, presented the members of the various church denominations in Central Penns Valley with Scripture text calendars. The calendars have printed on them the name of the parish and that of the pastor, and each month has a colored picture, a reproduction of a master's work of some religious scene. Under each week-day of the month is an appropriate Scriptural text, and for Sundays several texts. Colors appropriate for liturgical vestments are also given. On the back is a 200-year calendar and much other valuable information of a general character.

Hennigh and left here in 1919, for Kansas, after having graduated from Penn State in the department of dairy husbandry. He located in Birmingham about ten years ago and is engaged in the business of milk distribution in Birmingham. His company is incorporated, and their present business calls for 2,000 gallons of milk daily to supply their trade. During their stay here, of course, the several brothers of Mr. Hennigh living in this section were also visited, and at the home of one—Ellis Hennigh—the Southern ladies were treated to what to them was a novelty, namely, a sleigh ride, their first experience, and richly enjoyed. Miss Kathryn Hennigh is the daughter of David E. Hennigh, of Roseburg, Oregon, and is living with her uncle and aunt in the South to take advantage of the educational facilities offered by Birmingham Southern College, in which she matriculated last fall as a freshman. The party were traveling in a 1934 Ford sedan, recently purchased, and the trip home was by way of Washington and Atlanta.

PROFIT at today's milk prices demands MOST MILK from EVERY POUND OF FEED!

TODAY'S narrow margin between milk prices and production cost makes the Bull Brand money-back guarantee of most milk per feed dollar mean more than ever before. It can help you put your dairying on a more profitable basis.

Back of B-B Dairy Ration are years of testing against other feeds and constant improvement in productiveness and health-giving qualities. Back of it, also, is one of the largest and most modern mills, with facilities for taking proved, perfectly-balanced formulas and developing them into feeds of highest quality and absolute uniformity. For without a reliable and competent manufacturing organization and accurate equipment, formula by itself means little.

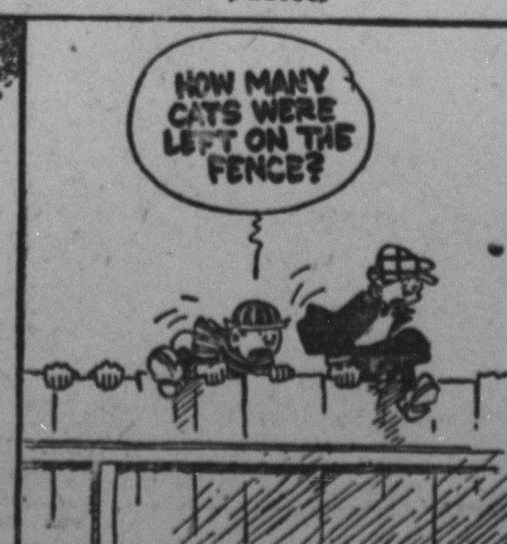

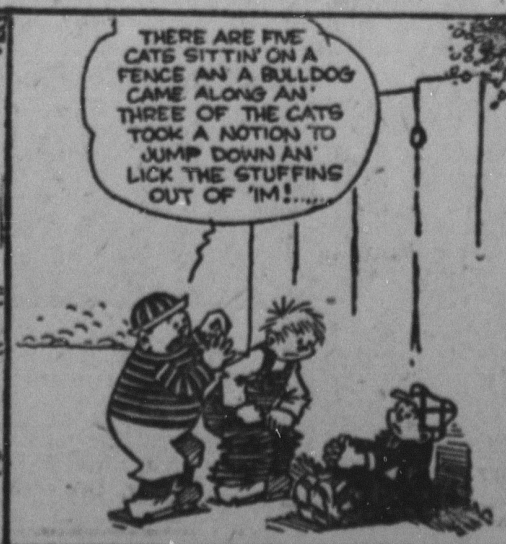

We offer you B-B Dairy Feeds with the guarantee that they will give you the most milk per feed dollar and also give you the privilege of trying them on one or two cows for 30 days. If you don't find that B-B increases production and improves the cow's health, bring back the empty bags with your figures and we will return your money.

It's the fairest offer ever made and comes at a time when lower cost milk production is a subject worth considering.
