The Reporter is indebted to A. E. Kerlin, who from his winter home in St. Petersburg, Florida, sent us copies of The Evening Independent of that city containing much interesting news about the annual Festival of States parade of 1934, a magnificent spectacle of pomp and pageantry and the rival of any of its kind in the country. Several days are given to the spectacle, which has for its keynote, so it seems, beauty.

C. F. Hennigh, tenant on the Swartz farm at Tusseyville, was in town on business on Friday. He is counted among the good young farmers in Potter township, but has not yet begun turning the sod for the coming corn crop. Charles Crust was another farmer intown on the same morning, and in reply to the question of whether or not he was turning sod, said his limestone soil was anything but ready for being worked.

"Sunshine and flowers all winter, just like your June," is the manner in which A. E. Kerlin describes conditions in St. Petersburg, Florida, on a postal forwarded to the Reporter. The temperature in St. Petersburg between March 23 and 30, including both dates, was: high range between 84 and 79; low range between 62 and 66; precipitation, .01 inch. Mr. and Mrs. Kerlin do not expect to return to their home here until the end of June.

From a well defined case of tetanus, Harry Reish lost through death one of his work horses a few days ago. The fact that both Mr. Reish, and A. P. Krape suffered losses of stock in undue numbers within the last few years, at the same barn, they are fearful that the place has become polluted with tetanus germs. An effort is being made to clean up the place with a view of eradicating the cause for the loss of stock which has always been cared for in the best possible manner.

The Gingerich farm at Linden Hall was sold at sheriff's sale, last week, to E. L. Orvis, attorney, representing Mrs. Kreamer, an heir, for \$6525. The farm is that long known as the Henry Gingerich homestead, and was sold as the property of Rome E. and Earl F. Gingerich, sons of Henry Gingerich. The brothers, it appears, bid the place up to \$4500, after which it was a free for all, at least two outside parties placing bids. It is understood the Gingerich brothers will offer their farm stock and equipment at public sale in the near future.

From the experience had by life insurance companies and banks, it is estimated that thousands of dollars of soldiers' bonus money voted to veterans by Pennsylvania and other States may never be paid unless the states undertake intensive efforts to locate men to whom money is due. It is doubtful if there is a bank or a life insurance company that has been in business for long time that does not have unclaimed funds on its hands. There are a small percentage of people who either do not know that money is due them or else just don't bother to collect it.

BANK LOANS AND BUSINESS RECOVERY

Official Describes Efforts of Reserve Banks to Bring Out Deserving Borrowers—Present Situation Typical

Appropos of the part that an expansion of business loans by banks occupies in the early stages of the business recovery which is now gaining headway, a Federal Reserve Bank official recently gave an interesting review of the experiences of his institution in this connection. In 1932 the Federal Reserve Banks were empowered by law to make direct loans to individuals in unusual circumstances when they had been unable to obtain loans from a commercial bank, he pointed out.

From the middle of 1932 to the end of 1933 there were 1,286 applicants for loans at the New York Federal Reserve Bank under this law. The great majority of these applications proved on examination to be for funds for capital purposes, which are properly supplied as an investment in the business, or else were mortgage loans or others unclassifiable as commercial.

Only Fourteen Qualify

Only 250, or less than 20 per cent, were of the type which merited detailed investigation. The amount involved was \$9,525,000. After further study of these, the Federal Reserve Bank was forced to turn down the applications of 236, finally offering credit in the sum of \$1,417,000 to 14 prospective borrowers. Of this amount, only \$806,000 was actually loaned, more than one-half of which was still outstanding many months later. Two of the borrowers went into receivership.

"Since it was the special endeavor of the Federal Reserve Bank to make every possible loan under the emergency provisions of the amendment, and since their best efforts resulted in the extension of so small a sum as to have no effect on the total volume of

commercial loans, it is a reasonable assumption that eligible borrowers entitled to bank credit are being provided for by the commercial banks," says the American Bankers Association Journal in commenting on this episode.

It is characteristic, as shown by studies of past business cycles, for changes in the volume of commercial bank credit to follow behind either contraction or expansion of business activity, says a financial writer in the New York Times. This was manifest recently in England's recent recovery where there was a lag between increased business and increased commercial loans.

County Key Bankers

Describing the activities of the Agricultural Commission of the American Bankers Association, the Director, D. H. Otis, says: "With 2,500 agriculturally minded bankers designated as county key bankers, there is enlisted a tremendous force for the improvement of agriculture. These key bankers bring organized assistance to progressive bankers, who are led to see the possibility of agricultural work in their communities. Banker-farmer tours are emphasized as a means of acquainting bankers, farmers and other business men with first-hand knowledge of how agricultural improvement methods are working out in practice. These give an opportunity for the key bankers to contact county bankers and work out new ideas."

4s & 5s

4s & 5s—we're speaking of figures which should adorn the label on your paper (or wrapper, if your paper reaches you that way.)

These figures are popular, and if your label has one, you know the editors are pleased. A "4" in "34" means your paper is paid to some time in the present year; a "5" in "35" means you're paid ahead to some time next year, indicated by the month used in connection with the figures.

Take a look now, won't you please, and see what figures follow your name on the label. The publishers have been lenient with many subscribers during the lean days of the past few years, and have carried them along without asking any questions or making any demands. Now, with business looking up we believe we have a right to ask that something be paid on delinquent accounts.

We trust we may have a generous response from those to whom we address this appeal.
